

3. Click **X** to close the dialog box.

Removing People in Workstreams

Workstream Owners can remove the users from the workstream depending on their business needs.

To remove an existing user from a workstream, complete the following steps:

1. Click **People**.
People in <Workstream_Name> dialog box appears.
2. Click the **Role** drop-down for the user you wish to delete from the workstream.

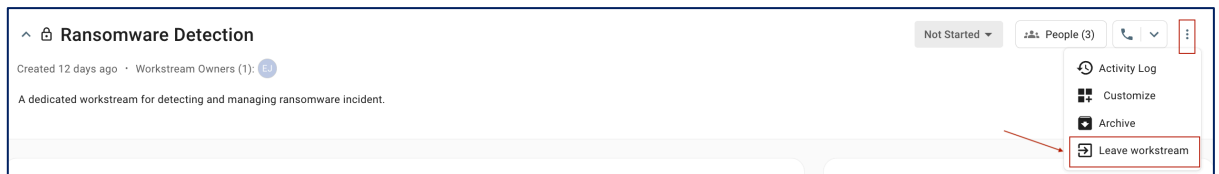

3. Click **Remove**.
4. Click **X** to close the dialog box.

Anyone who's part of the workstream, regardless of their role (Owner, Contributor or Viewer) can leave a workstream by themselves.

To leave a workstream that you're part of, follow these steps:

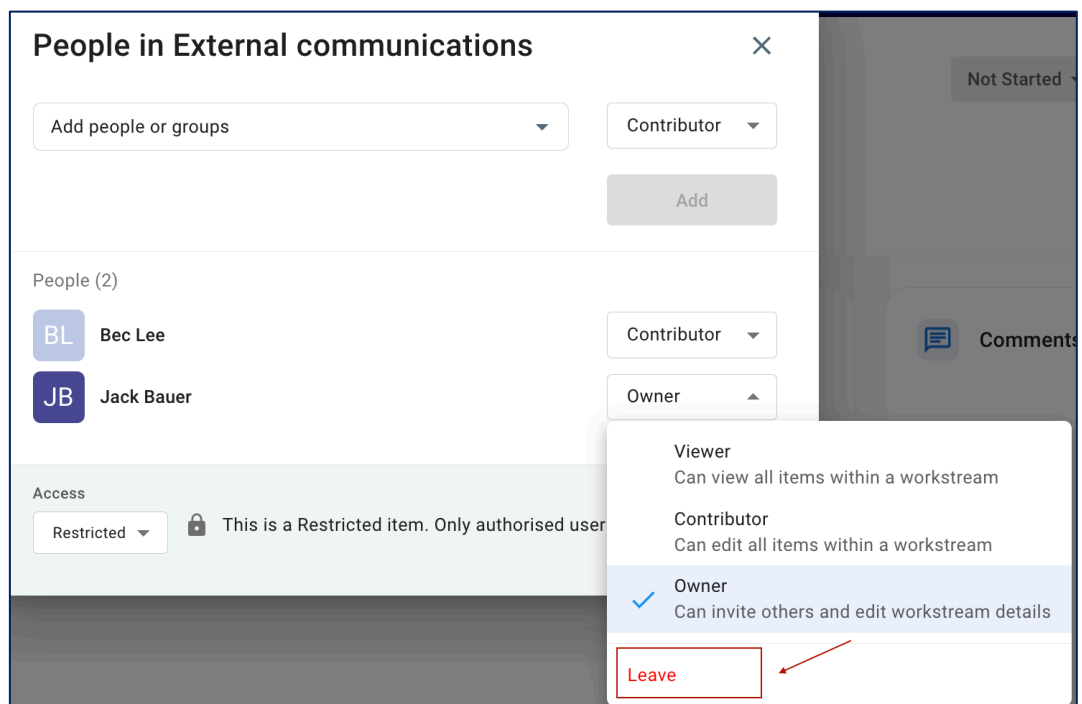

1. Click the vertical ellipsis at the top-right corner, and then click **Leave workstream**.

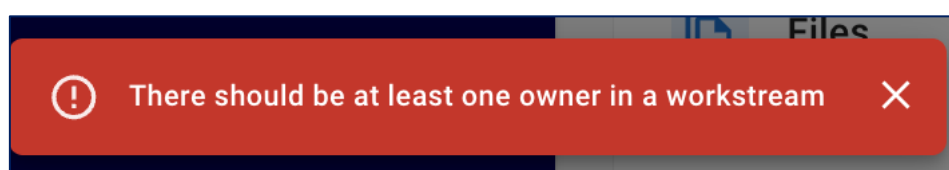

- a. If you're the **Owner** of the workstream, you'll also have the option to **Leave** from the **People** section. Click **People**.

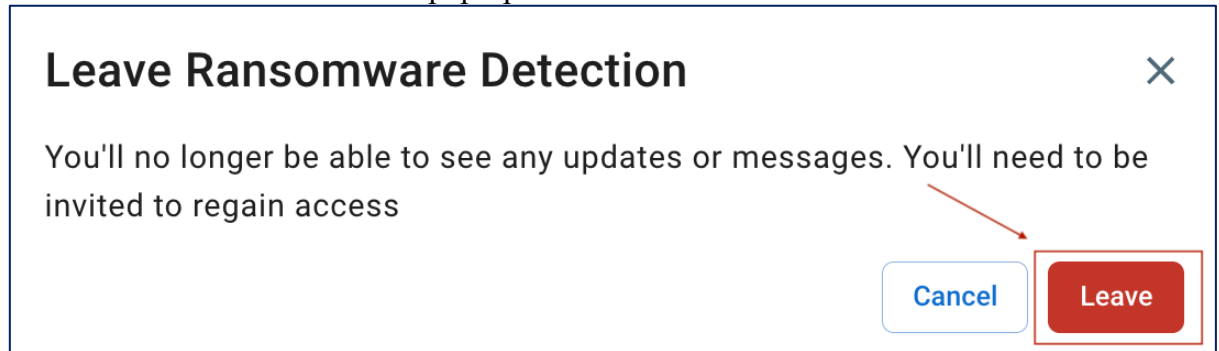

- b. Click **Leave**.

If you're the only owner of the workstream, you'll not be able to leave it and will see the below warning message when you try to leave the workstream.

2. Click **Leave** in the confirmation pop-up.

- You'll see **Leave workstream** option only if you're added to the workstream directly and not as part of a group.
- If you're only part of a group that has access to the workstream, you'll not see the **Leave workstream** option. If you still wish to leave the workstream, you can either request the **Workstream Owner** to remove the group or ask the **Room Administrator** to remove you from the group from the **People & Companies** section.
- If you're added to a workstream both directly and as part of a group, clicking **Leave workstream** will remove your individual access, but you still retain access through the group.

Once you leave, you'll immediately lose access to any updates or notifications from that workstream.

- If it's an open workstream, then you can click **Join workstream** to gain back access.
- If it's a restricted workstream, you'll no longer see this workstream, and you need to be invited to regain access to it.

Once you leave a workstream, you'll no longer have access to any tasks assigned to you or any mentions in comments within that workstream.

Managing Workstream Access (Open and Restricted)

Workstream access can be open or restricted to selected users. The available workstream accesses are:

- **Restricted** – The Workstream is accessible only to the selected users of the workstream. The other users of the room cannot join by themselves.
- **Open** - The Workstream is open to all users of the room. Any user in the room can join this workstream by themselves.

Only the Owners of the workstream can manage access to it.

To modify the workstream access, complete the following steps:

1. Click **People**.
People in <Workstream_Name> dialog box appears.
2. Select an option from the **Access** drop-down list.

- Ransomware Detection**
- Root Cause Analysis**
- Eradication**

Joining Restricted Workstreams

You can view the restricted workstreams only if you have access. If you are not included in a restricted workstream, those workstreams are not displayed to you.

Adding Facts in Workstreams

Facts are pieces of information that you know are true and relevant to the workstream.

Owners and Contributors of a workstream can add facts to it.

To add a fact, complete the following steps:

1. Click +, and then click **Add Fact**.
2. Enter a fact name.
3. Select the Fact Type as one of the options:
 - Single-line text
 - Paragraph
 - Date
 - Numeric
 - Single Selection
 - Multiple Selection
 - Toggle (Yes/No)
4. Enter a fact value.
5. Enter the description of the added fact.
6. Click **Add Fact**.

Adding and Importing a Fact Group

Facts can be grouped under a Fact group. Owners and contributors can organize the related facts so that all the relevant facts are grouped together.

To create a Fact group, complete the following steps:

1. Click +, and then click **Add Fact Group**.

2. Enter a fact group name.
3. Add a description to the fact group.

The screenshot shows a form titled 'Important Dates' with a close button (X) in the top right. It has a 'Description' field with the text 'A fact group to group all important dates of the incident.' Below this is a 'Facts' section with a '+' icon and a text input field containing '+ Add Fact to Group'. At the bottom right, there are two buttons: 'Cancel' and 'Create Fact Group' (which is highlighted with a red box). A red arrow points from the 'Create Fact Group' button to the 'Facts' section.

4. (Optional) Add a new fact to this group. Refer [Adding Facts in Workstreams](#).
5. Click **Create Fact Group**.

Fact groups can also be imported from a ready-to-use room template.

To import a fact group from the room template, complete the following steps:

1. Click a room and a workstream.
2. Click **Add Fact** menu.
3. Click **Import Fact Group**.
4. On the **Import Fact Group** pop-up, select a fact group template from the list.
5. Click **Import**.

Irrespective of where you make the changes, they'll be reflected in both the web and mobile app versions.

Adding Tasks

Task is a piece of work to be completed under a workstream. Tasks can be assigned, prioritised, and tracked within the workstream. Tasks can also have subtasks.

Owners and Contributors in a workstream can add and manage tasks and their subtasks.

To add a task, complete the following steps:

1. Click +.
2. Enter a task name.
3. Click **Add**.

Tasks

Determine the scope of the compromise, including the number of affected systems and user accounts.

Add

✕

Task Details

Tasks have attributes to track its completion. After adding tasks, hover the added task to add the following attributes.

The screenshot shows the 'Tasks' section of the CYGNVS interface. At the top, there's a 'Tasks' header with a checkmark icon and a plus icon. Below it, there's a filter bar with '1 result', 'My Tasks', 'Assignee', 'Priority', 'Status', and 'Clear Filters'. A red circle with the number 6 is next to 'Clear Filters'. The main table has columns: Name, Priority, Assignee, Due Date, and Status. The first row shows a task named 'Determine the scope of the compr...' with a red circle 1 under the name, a red circle 2 under the priority (indicated by an exclamation mark), a red circle 3 under the assignee (indicated by a plus icon), a red circle 4 under the due date (labeled 'Set Due Date'), and a red circle 5 under the status (labeled 'Not Started').

1. **Task Name** – It defines the name of the task.
2. **Priority** – Click to define a priority for the task (Available values are **High**, and **Normal**). Default value is **Normal**.
3. **Assignee** – Assign a user to this task. Only the members of the workstream can be assigned.

When a member is in the room and not available in workstream, they cannot be added as a task's assignee.

4. **Due Date** – Click to add a due date for the task and click **Save**.
5. **Status** – Select a value to define a status for the task (Available values are **Not Started**, **In Progress**, and **Complete**). The statuses can be customized using the template. Default value is **Not Started**.
6. **Task Filters** – These buttons filter the tasks based on the assignee, priority, and status. For example, clicking the **In Progress** button filters the tasks with status as **In Progress**. **My Tasks** button filters the list of tasks assigned to your name within the workstream.

Edit Task

Owners and Contributors within a workstream can edit the tasks in that workstream or modify their attributes at any time after creation.

This screenshot is similar to the one above but highlights the task name 'Determine the scope of the compr...' with a red rectangular box. A red arrow points from the top right of this box towards the 'Priority' column, indicating the next step in the editing process.

Click the task to view and edit its details.

The screenshot shows a task creation form with the following elements:

- 1. Task Name:** A text input field containing "Determine the scope of the compromise, including the number of affected systems and user accounts."
- 2. Description:** A text input field with the placeholder "Provide a more detailed description..."
- 3. Subtasks:** A section with a "+ Add Subtask" button.
- 4. Related Facts:** A section with a "+ Add related fact" button.
- 5. Status:** A dropdown menu currently set to "Not Started".
- 6. Due Date:** A section with a "Set Due Date" button.
- 7. Priority:** A dropdown menu currently set to "High".
- 8. Assignee(s):** A section with a "+ Add Assignee" button.

At the bottom right, it says "Last updated by Mike Thompson 9 minutes ago".

1. **Task Name** – Modify the name of the task and click **Save**.
2. **Description** – Add a detailed description of this task.
3. **Subtasks** – Add a subtask (if applicable).
 - a. Enter a subtask name.
 - b. Click **Add**.
4. **Linked Facts** – Links a fact to this task.
5. **Status** – Select a value to define the status for the task (Available values are **Not Started**, **In Progress**, and **Complete**). The statuses can be customized using the template. Default value is **Not Started**.
6. **Due Date** – Click **Set Due Date** to assign a due date for this task. You can also set a time for the task.
The time is based on the user's time zone settings in [Language & Region](#) section. To clear the already set time, click **Clear** and **Save**.

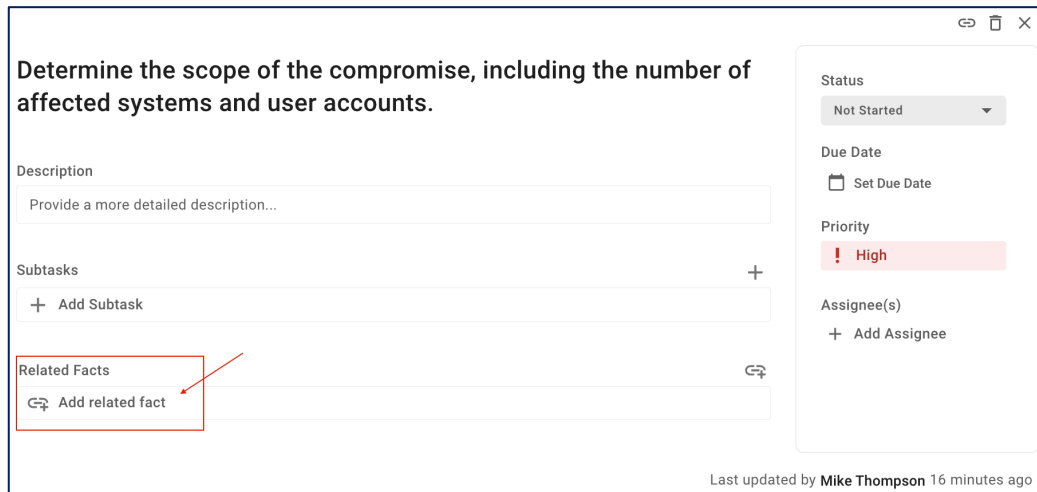

This screenshot shows the same task creation form as above, but with a calendar and time picker overlay. The calendar is for June 2025, and the date 12 is selected. The time picker shows 03:50 PM. A red arrow points to the "Save" button in the time picker.

7. **Priority** – Click to define a priority for the task (Available values are **High**, and **Normal**). Default value is **Normal**.
8. **Assignee** – Click + **Add Assignee** to assign this task to a user in the workstream. Select the list of users or a group for this task.

When a user is in the room and not available in workstream, they cannot be added as a task's assignee.

Linking Facts with Tasks

Facts can be linked with the tasks. It is helpful to update the facts as and when the task gets completed.

Determine the scope of the compromise, including the number of affected systems and user accounts.

Last updated by Mike Thompson 16 minutes ago

To link a fact with a task, complete the following steps:

1. Click **Add related fact**.
2. Select or search a fact available in the workstream. You can also add multiple facts associated with this task.

Related Facts

Number of Systems Search for facts in this workstream

Link Cancel

3. Click **Link**.

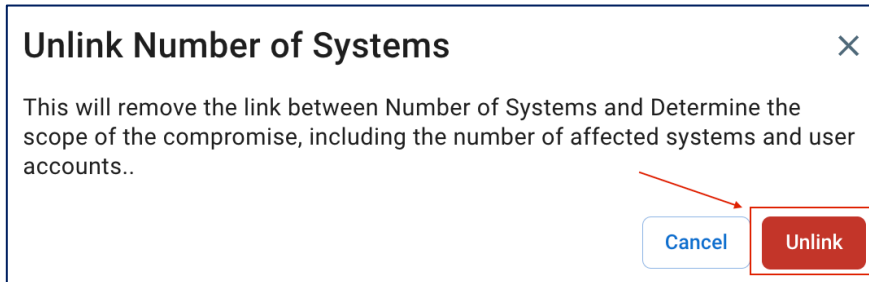

Unlinking Facts

To unlink a linked fact from a task, complete the following steps:

1. Hover the mouse over the related fact row, and click the **Unlink Fact** icon.

2. Click **Unlink** to confirm.

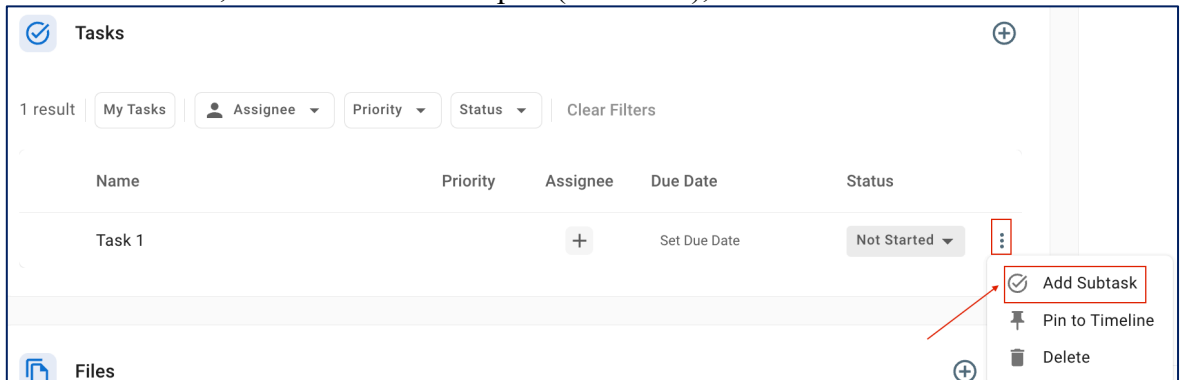

Adding Subtasks

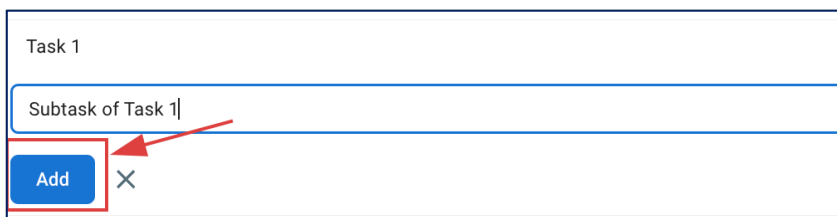

A primary task can have a number of subtasks. This helps to organize all the subtasks under a primary task.

To add a subtask under a primary task, complete the following steps:

1. In the task's row, click the vertical ellipsis (three dots), and then click **Add Subtask**.

2. Enter a name for the subtask.

3. Click **Add**.

Subtasks attributes can be modified similar to tasks. Refer [Edit Task](#) for more information.

Tasks +					
2 results My Tasks Assignee Priority Status Clear Filters					
Name	Priority	Assignee	Due Date	Status	
Task 1		+	Set Due Date	Not Started	⋮
↳ Subtask of Task 1		+	Set Due Date	Not Started	⋮

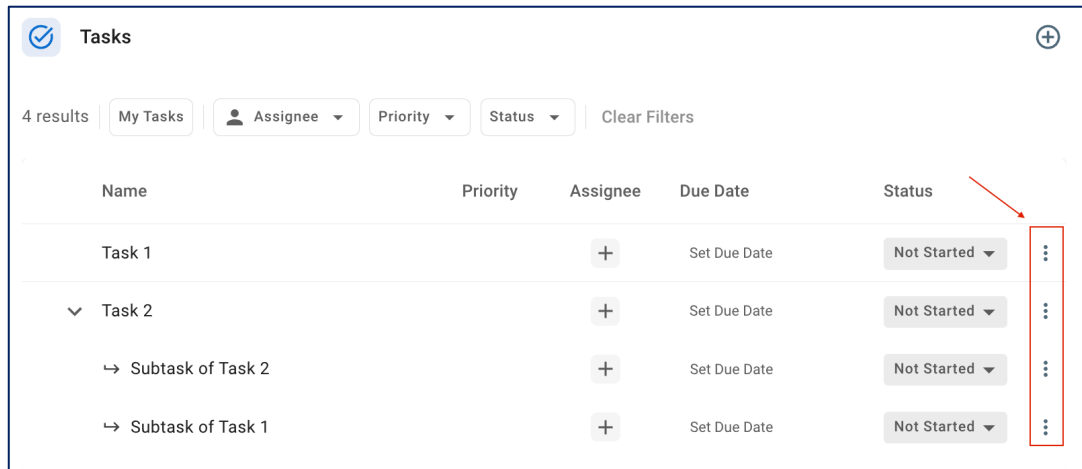

Moving Tasks and Subtasks

Task and subtasks can be moved within the same task or between different tasks. To move a primary task, drag the task or subtask row and move to the destination task.

Tasks Before +					
4 results My Tasks Assignee Priority Status Clear Filters					
Name	Priority	Assignee	Due Date	Status	
Task 1		+	Set Due Date	Not Started	⋮
↳ Subtask of Task 1	!	+	Set Due Date	Not Started	⋮
Task 2		+	Set Due Date	Not Started	⋮
↳ Subtask of Task 2		+	Set Due Date	Not Started	⋮

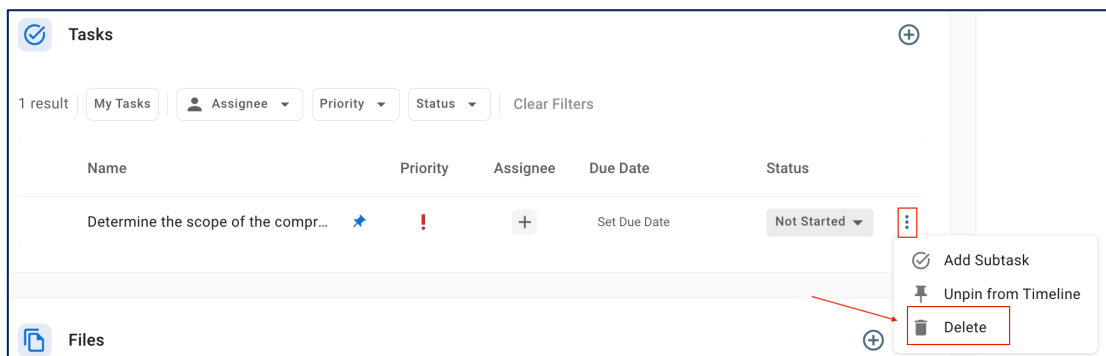

Tasks After +					
4 results My Tasks Assignee Priority Status Clear Filters					
Name	Priority	Assignee	Due Date	Status	
Task 1		+	Set Due Date	Not Started	⋮
Task 2		+	Set Due Date	Not Started	⋮
↳ Subtask of Task 2		+	Set Due Date	Not Started	⋮
↳ Subtask of Task 1		+	Set Due Date	Not Started	⋮

Task and subtasks can be deleted through in-line menu available on the task row.

To delete a primary task, complete the following steps:

1. In the task's row, click the vertical ellipsis (three dots), and then click **Delete**.

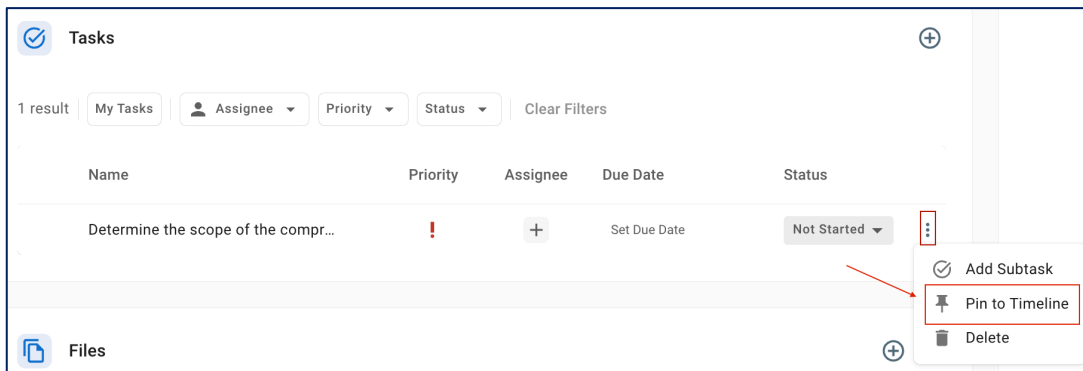

2. Click **Delete** to confirm.

Subtasks can also be deleted with the above procedure (step 1 and step 2).

When a primary task is deleted, all of its subtasks are also deleted. This action cannot be undone, so be sure before you delete a primary task.

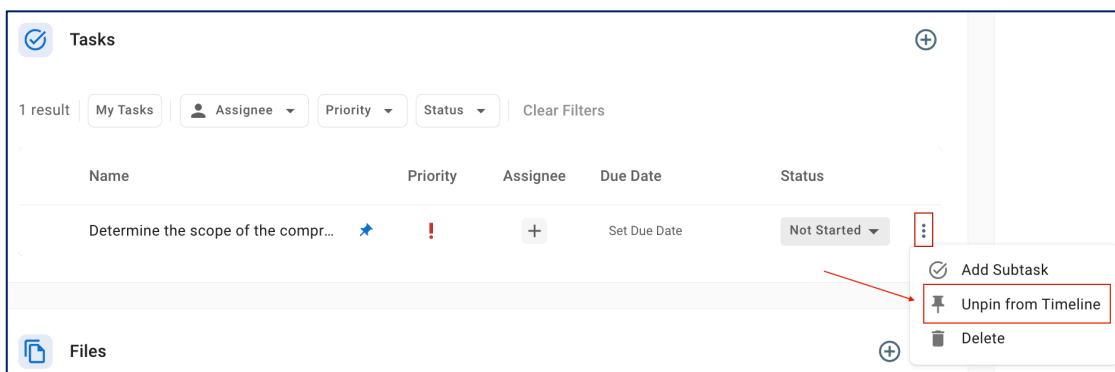

Pinning Tasks and Subtasks

The tasks can be pinned to a timeline will be displayed in the **Overview** section of the category. To pin a task, in the task's row, click the vertical ellipsis (three dots), and then click **Pin to Timeline**.

The pinned task gets displayed in the timeline with the date as the last updated date of the task.

To unpin a pinned task, in the task's row, click the vertical ellipsis (three dots), and then click **Unpin from Timeline**.

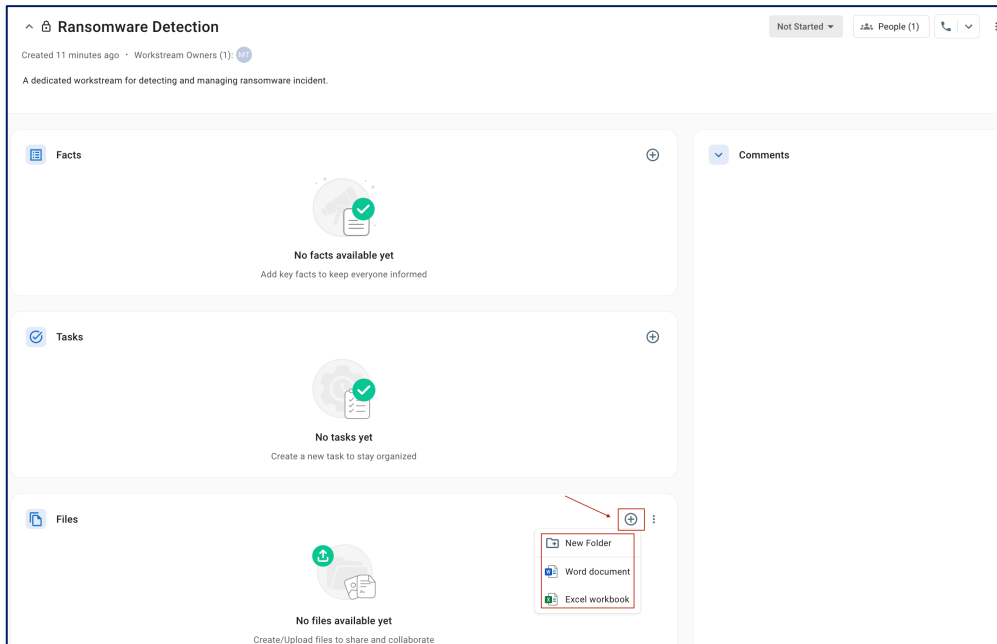

When the tasks do not have a due date, the pinned task is added on the tasks' last updated date in the timeline.

When the tasks have a due date, the pinned task is added on the tasks' due date in the timeline.

Adding Files

Files is a subsection of workstream where you can upload, view, download, and share files to collaborate with other workstream users.

Owners and Contributors in a workstream can add and manage files in it.

Files section offers the following four functionalities:

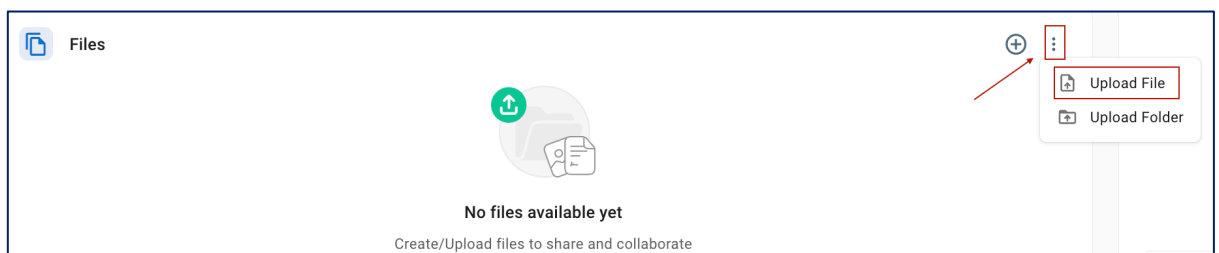

1. Document Repository
2. Document Preview
3. Document Editing within CYGNVS app
4. Document Sign Request

Document Repository

Files section serves as a document repository for the workstreams. Files relevant to the workstreams can be uploaded either as an individual file or as folders.

You can upload single or multiple files in the **Files** section.

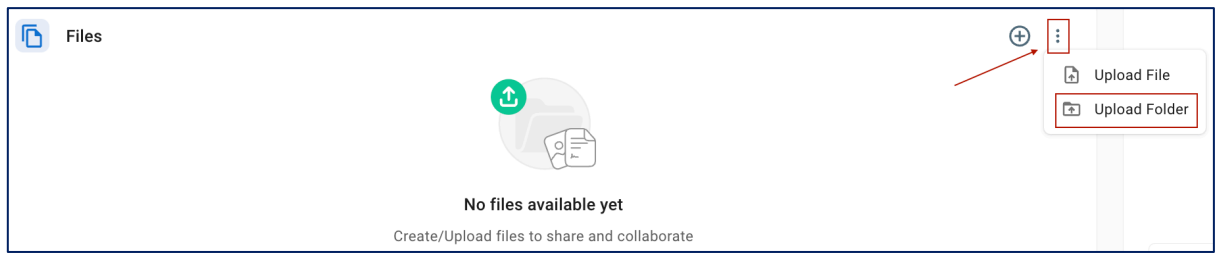

1. To upload a file, click the vertical ellipsis (three dots), and then click **Upload File**.

2. Select a file from your device.
3. Click **Open**.

You can also upload the entire folder in the **Files** section.

1. To upload a folder, click the vertical ellipsis (three dots), and then click **Upload Folder**.

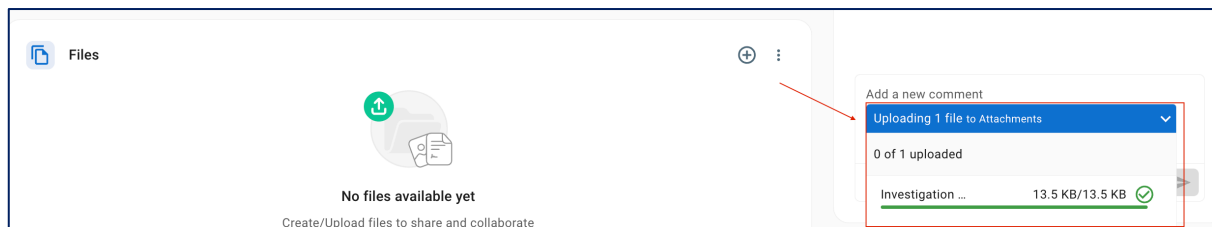

2. Select a folder from your device.
3. Click **Upload**.

File Uploading Window

When single or multiple files are uploaded, the uploading window appears below the **Comments** section.

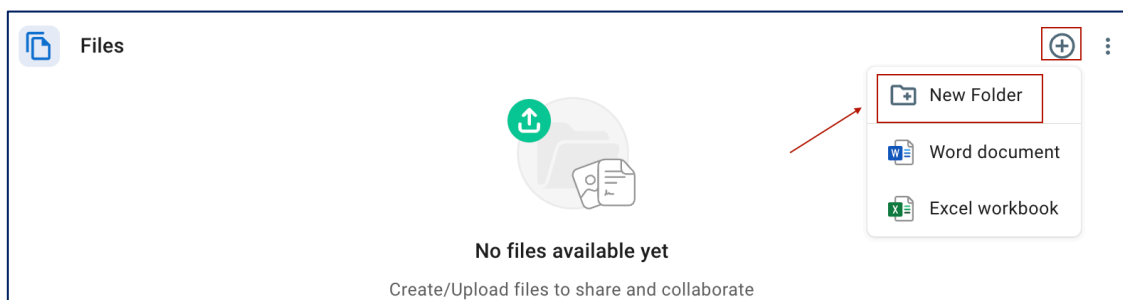

You can either view the uploading status or click Close (X) to cancel it.
The successfully uploaded files are displayed with a green check mark.

Creating a New Folder in Files

You can create a folder to organize the uploaded files in the **Files** section.

1. To create a new folder, click +, and then click **New Folder**.

2. Enter a name for the folder.

Create a folder

×

Create

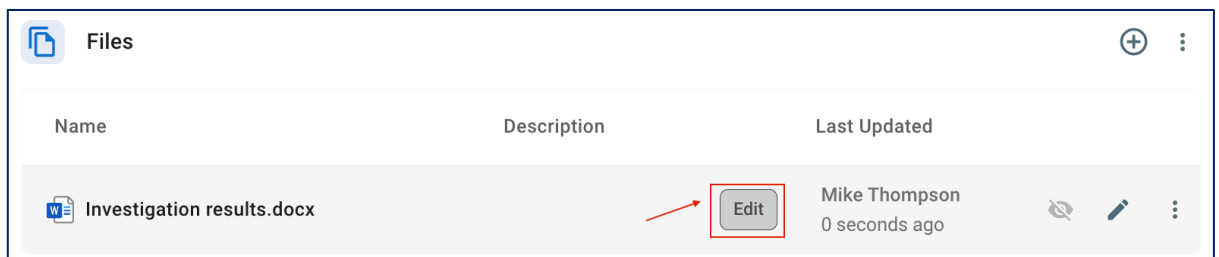

Adding Descriptions to Files in Files Section

You can add descriptions to the files added in the **Files** section to give more context to the users.

You cannot add descriptions to folders added in the **Files** section.

To add a description to a file, complete the following steps:

1. Hover the mouse over the file row and click **Edit** under **Description**.

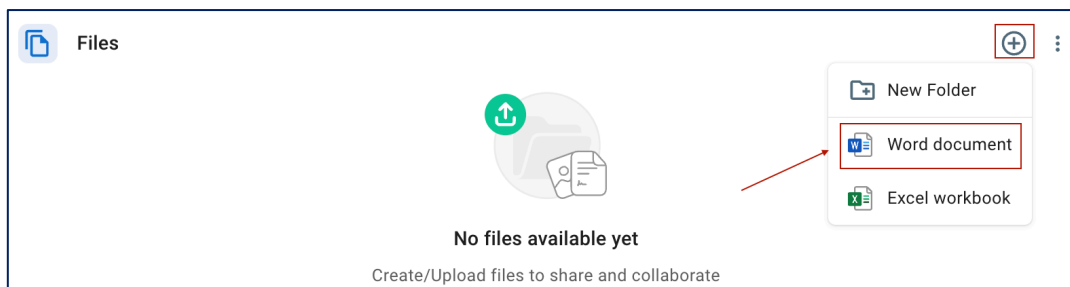

2. Add or edit the description.
3. Press **Enter** or **Return** in your keyboard.

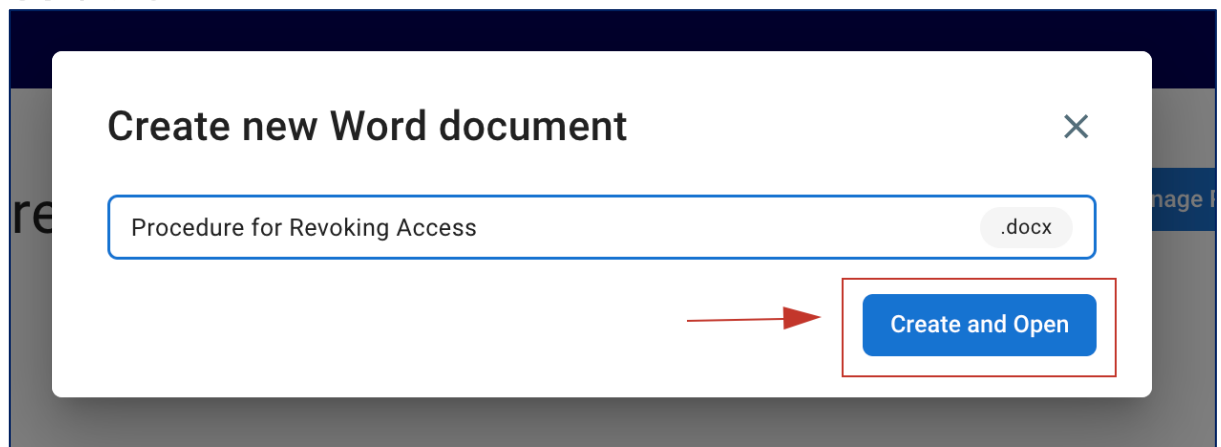

Creating New Word Files in Files

You can create a new file of type document (**.docx**) in the **Files** section, and these will be automatically stored in the **Files** section.

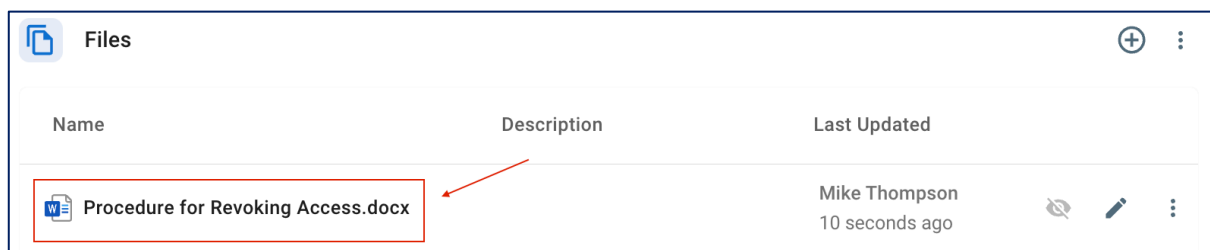

1. To create a new file of type **document (.docx)**, click **+**, and then click **Word document**.

2. Enter a name for the Word document.
3. Click **Create and Open**.

A new file will be opened for editing in a new tab. The file is auto stored in the **Files** section as shown below:

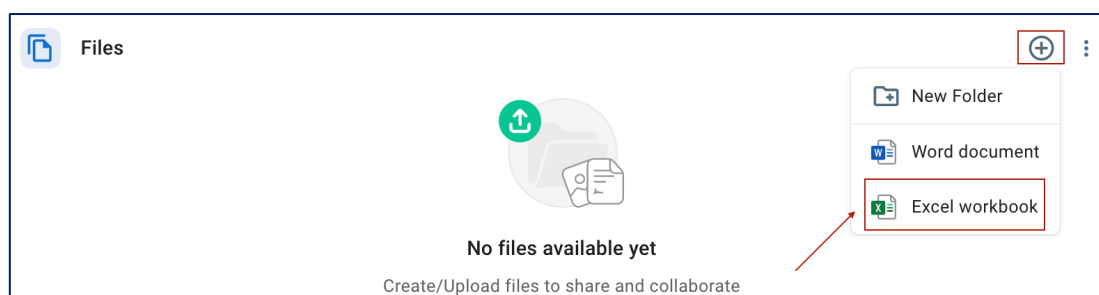

The document editing window of a file opens in a single tab and cannot be accessed in multiple tabs. If you attempt to open the file in another tab, you will be taken to the tab where it is already open. This prevents conflicting edits and potential data loss across sessions.

Creating New Excel Files in Files

You can create a new file of type workbook (**.xlsx**) in the **Files** section, and these will be automatically stored in the **Files** section.

1. To create a new file of type **workbook (.xlsx)**, click +, and then click **Excel workbook**.

2. Enter a name for the Excel workbook.
3. Click **Create and Open**.

Create new Excel workbook

×

List of Affected Users

Create and Open

A new file will be opened to edit in a new tab. The file is auto stored in the **Files** section as show below.

Files		
Name	Description	Last Updated
 List of Affected Users.xlsx		Mike Thompson 2 seconds ago
 Procedure for Revoking Access.docx		Mike Thompson 54 seconds ago

File Types and Limits

The maximum file and folders sizes in the **Files** section are:

Type	Description
Individual File	Maximum size up to 1 GB (1000 MB)
Folders	Maximum size up to 2 GB (2000 MB)

The allowed file types and extensions in the **Files** section are:

File Types	Extensions
Documents	.doc, .docx, .txt, .rtf, .pdf
Spreadsheets	.xls, .xlsx, .xslm
Presentations	.ppt, .pptx
Images	.jpeg, .jpg, .jpe, .jfif, .png, .bmp, .gif, and .svg
Text Files	.txt
Audio Files	.mp3
Video Files	.mp4, .mov, .wmv
Data Files	.csv, .json

Archive Files	.zip
Flowchart and Diagram Files	.vsdx
Email Messages	.msg
Markdown Files	.md

File Views and File Description

The **Files** section also displays the name of the files and folders, its description, size and the time at which it was modified last.

Files				
Name	Description	Last Updated		
 List of Affected Users.xlsx		Mike Thompson 2 seconds ago		
 Procedure for Revoking Access.docx		Mike Thompson 54 seconds ago		

You can add a description to the uploaded files. In the **File** row, hover the mouse over the **Description** column and click **Edit** to add the description.

In the file's row, click the vertical ellipsis (three dots), and then click **File details** to view its details.

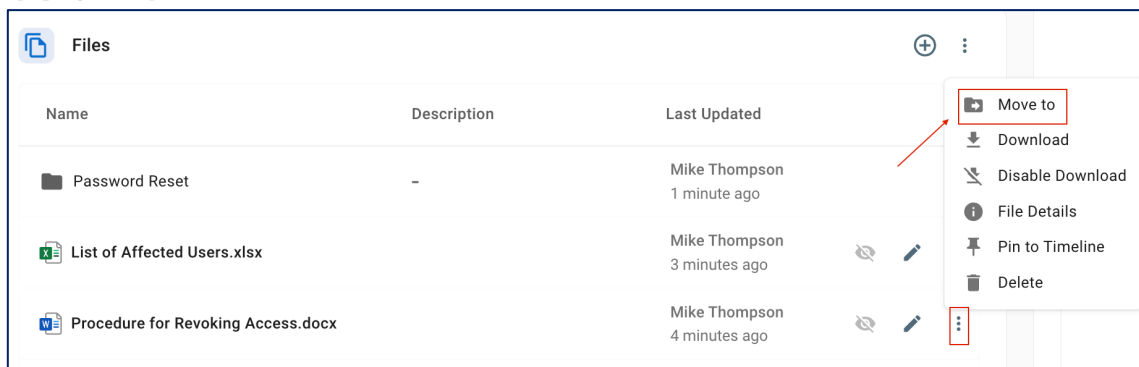

Moving Files

Files can be moved to other folders within the **File** section. You can move files from the base level to a folder.

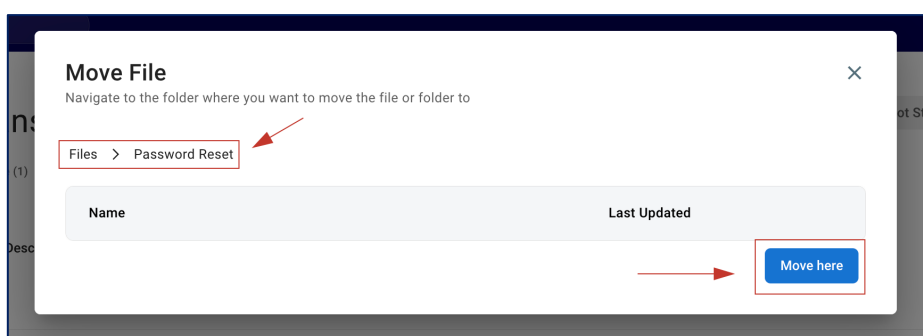

The **Move to** option is enabled for a file only when there are folders available in the **workstream**.

Create a new folder before moving a file from root folder to a specific folder.

1. To move a file, in the file's row, click the vertical ellipsis (three dots), and then click **Move to**.

2. In the **Move File** box, select a folder where you wish to move the file.

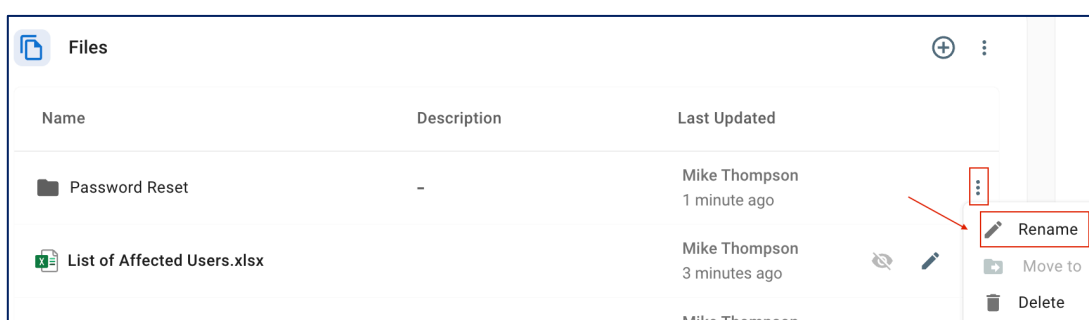

3. Click **Move here**.

Renaming Folder

You can rename a folder created in the **Files** section.

To rename a folder, complete the following steps:

1. In the folder's row, click the vertical ellipsis (three dots), and then click **Rename**.

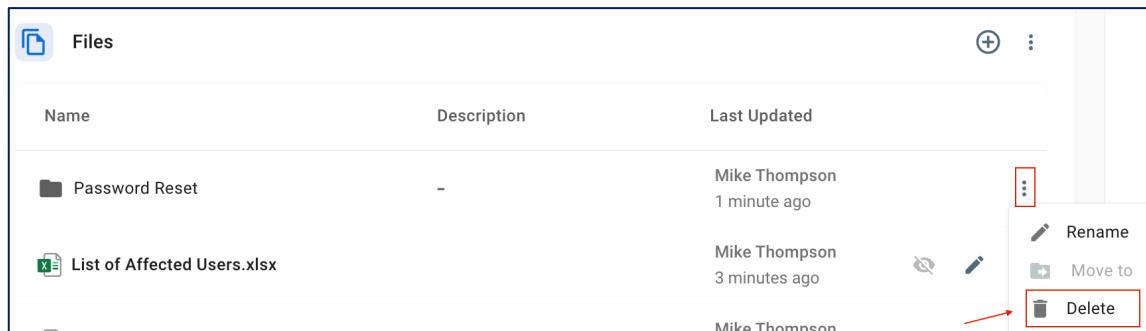

2. Enter the new name and click **Rename**.

Deleting Files and Folder

You can delete a folder or file uploaded in the **Files** section.

In the folder or file's row, click the vertical ellipsis (three dots), and then click **Delete**.

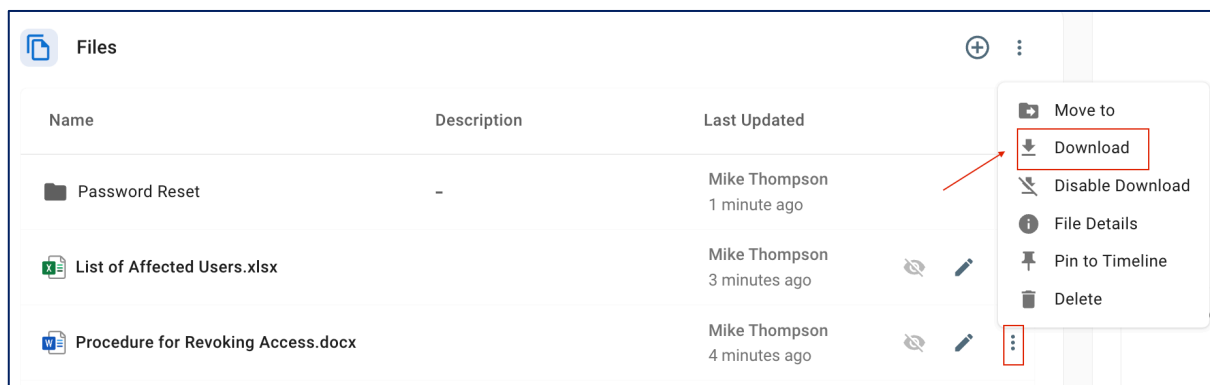

When a folder is deleted, all the files it contains are also deleted. This action cannot be undone, so be sure before you delete a folder.

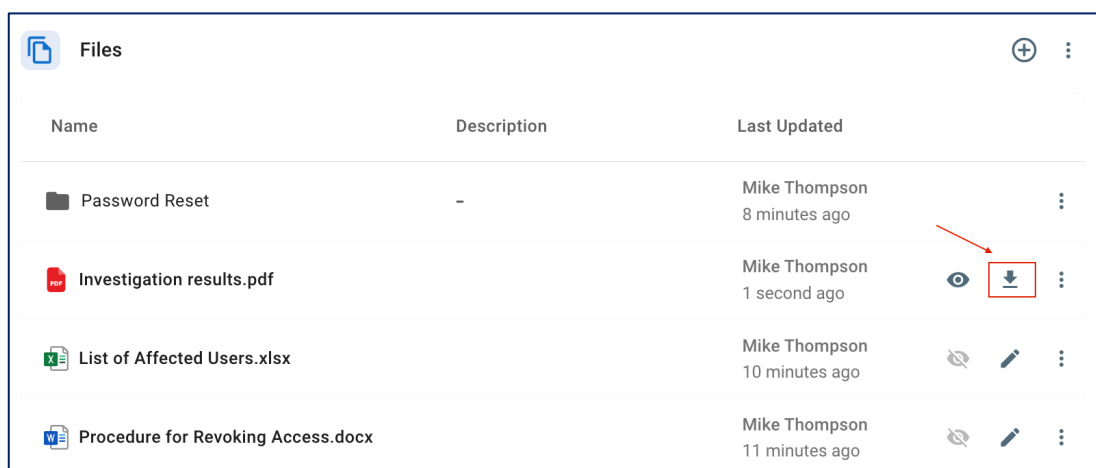

Downloading Files

You can download the files from the **Files** section.

In the file's row, click the vertical ellipsis (three dots), and then click **Download** to download the file.

If a file does not have the **Edit (Pencil)** icon and instead displays the **Download** icon, you can download the file by just clicking the **Download** icon directly in its row.

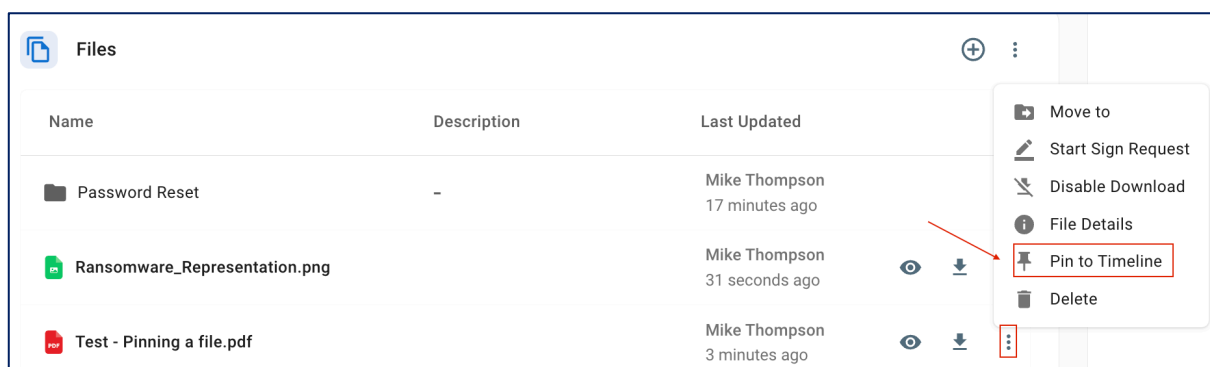

You can also disable downloading a file by clicking on the **Disable download**. Once done, the file cannot be downloaded by anyone.

The **Download** option appears only for the files and not for folders. All files within a folder cannot be downloaded at once. It is recommended to download individual files within a folder.

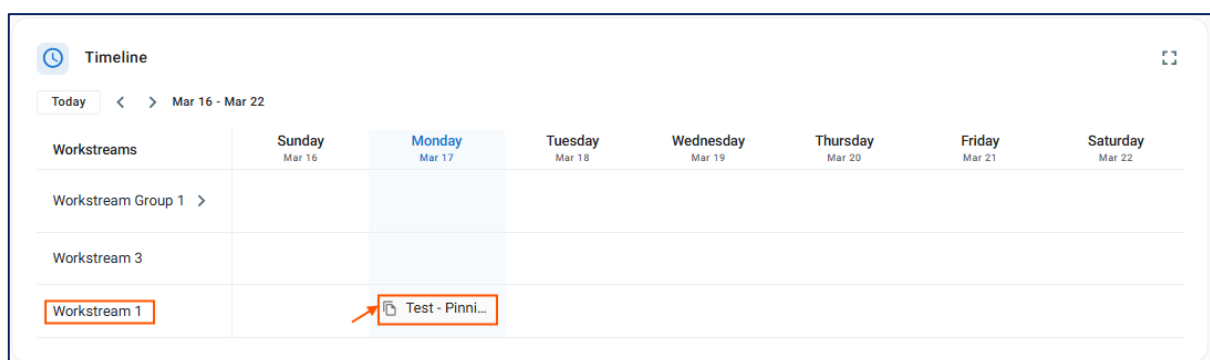

Pinning Files

The files can be pinned to a timeline displayed in the **Overview** section of the category. To pin a file, in the file's row, click the vertical ellipsis (three dots), and then click **Pin to Timeline**.

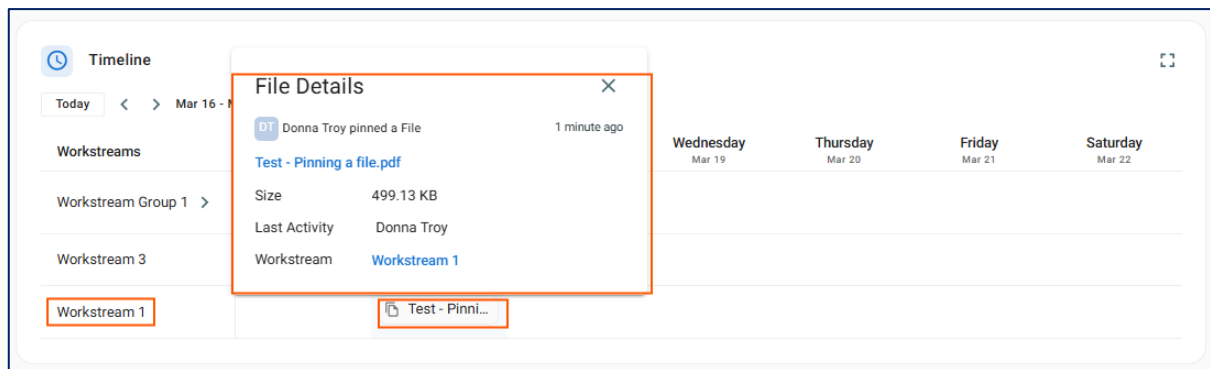

The pinned files appear in the timeline on the relevant workstream row (as shown below) based on the most recent of the following dates: File uploaded date, file modified Date, date when the file description was modified, or the date by when the status of the PDF Sign request was changed. If none of these apply, the file appears based on its last modified date.

File Type	Uploaded Date	Modified Date	Description Modified Date	Status Date of PDF SignRequest
.docx, .xlsx	Yes	Yes	Yes	No
.pdf	Yes	No	Yes	Yes
Other files	Yes	No	Yes	No

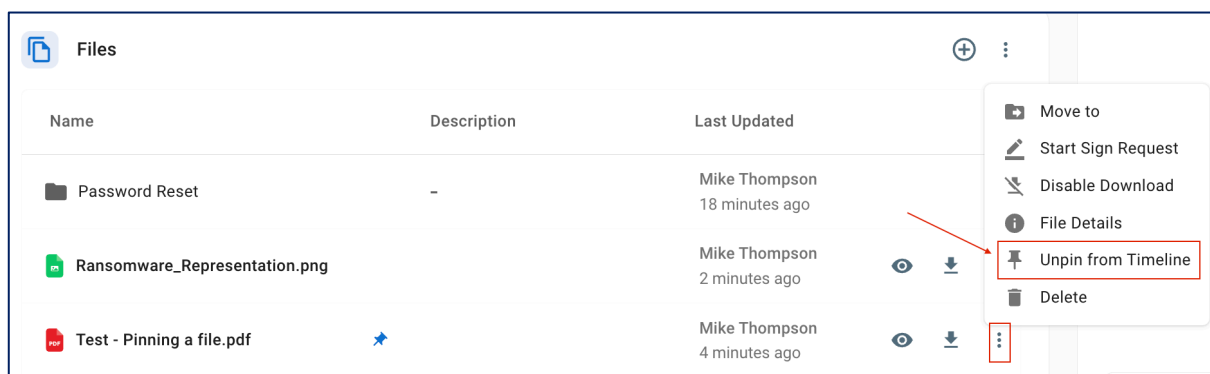

When you click on the pinned file in the timeline, a pop-up box appears with the details about the file, such as its name, size, and the name of the respective workstream as shown below.

Clicking the file name in the pop-up window takes you to the **Files** section of the relevant workstream.

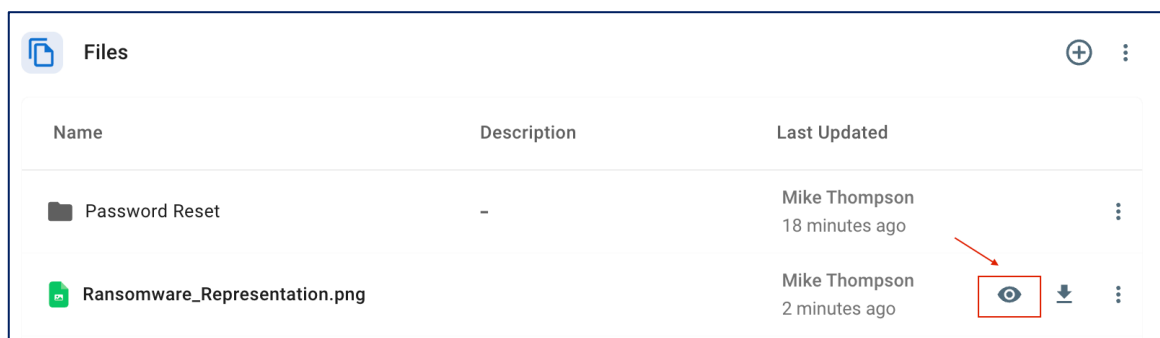

To unpin a pinned file, in the file's row, click the vertical ellipsis (three dots), and then **Unpin from Timeline**.

Document Preview

You can preview a diverse range of files including PDFs, TXT documents, and images, without the need to download them to your device first.

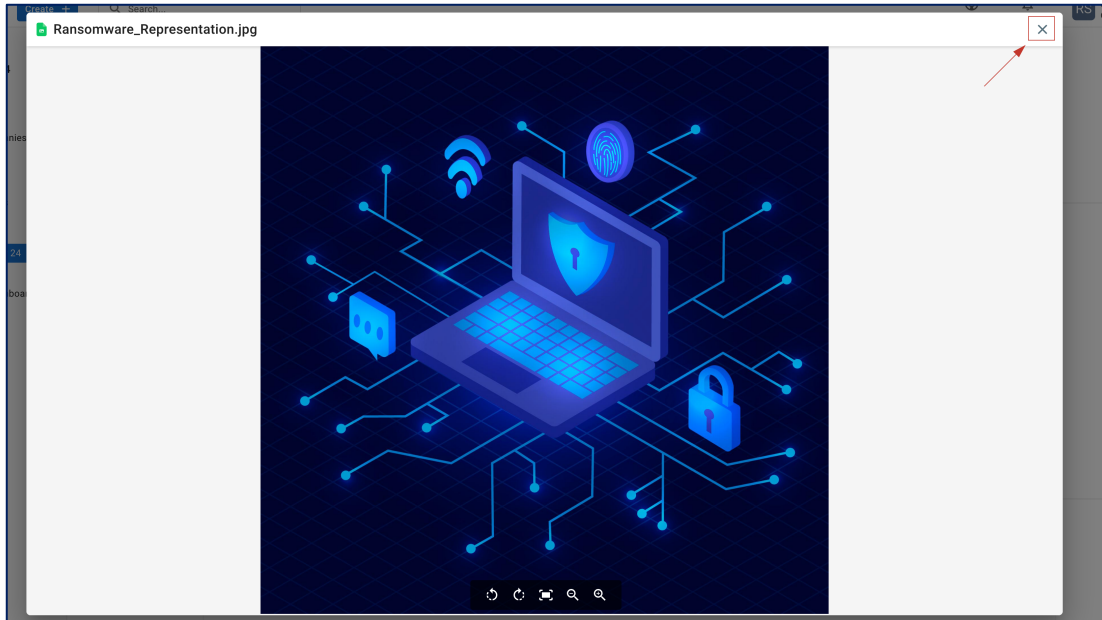

You can scan the contents of a file, providing valuable insights before making the decision to save it.

Supported File Formats:

- PDF files (.pdf)
- TXT files (.txt)
- Image files (.jpeg, .jpg, .png, and .svg)
- Markdown files (.md)

To preview a file, click the **Preview (Eye)** icon.

The file is displayed as a pop-up on top of the room. To return to the workstream view, **close (X)** the pop-up window.

PDFs with a maximum file size of 25 MB can be previewed.

Files				
Name	Description	Last Updated		
Password Reset	-	Mike Thompson 21 minutes ago		
Ransomware_Representation.png		Mike Thompson 5 minutes ago		
Investigation results.pdf		Mike Thompson 13 minutes ago		
List of Affected Users.xlsx		Mike Thompson 23 minutes ago		
Procedure for Revoking Access.docx		Mike Thompson 24 minutes ago		

The files of type .docx and .xlsx cannot be previewed. You can download those files to view them.

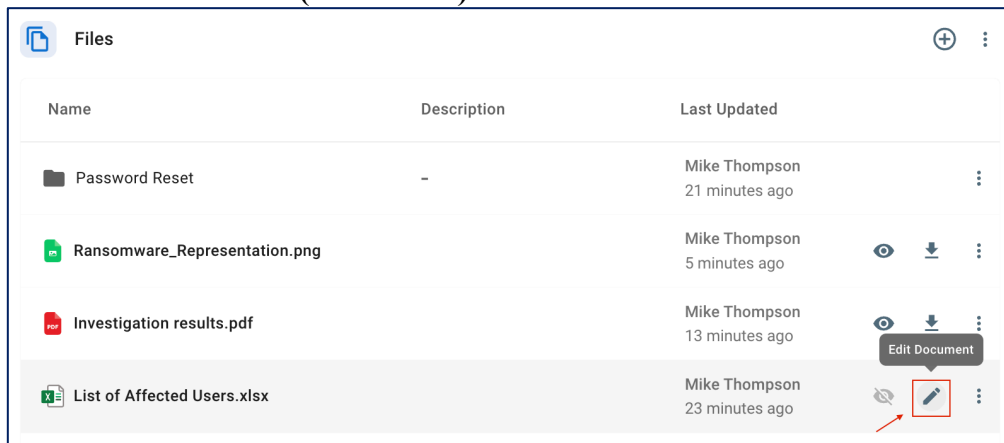

You can edit the **.docx** and **.xlsx** files within the CYGNVS platform in a new browser tab. It allows you to skip the steps of downloading the files to your device for making edits and then uploading the edited file in the **Files** section. Supported files are:

- Document files (.docx)
- Spreadsheet files (.xlsx)

The documents to be edited should be less than or equal to 6 MB. Documents with file size above 6 MB cannot be edited within the CYGNVS platform. It is recommended to download and edit those files and re-upload them to the **Files** section.

To edit a document, complete the following steps:

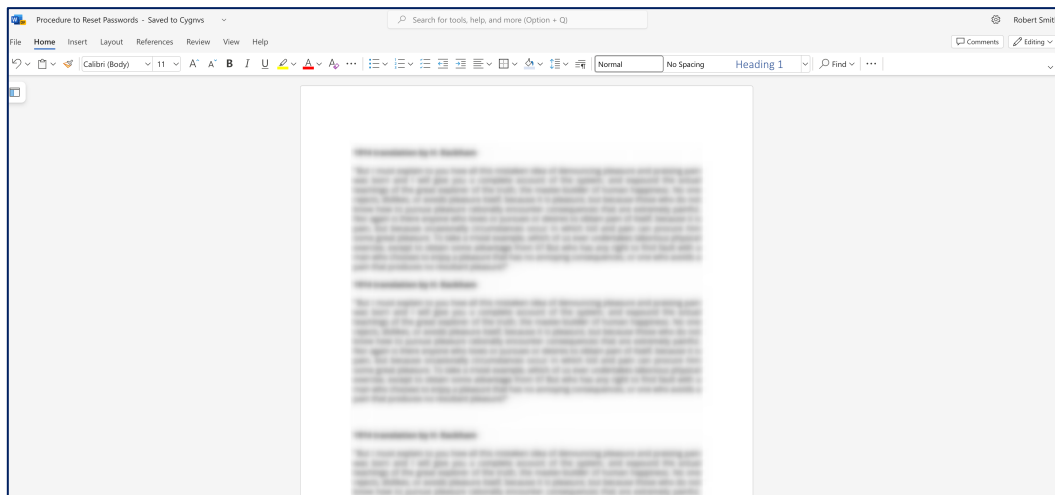

1. Click **Edit Document (Pencil icon)** on the file row.

The file opens in a new browser window for editing.

Alternatively, you can also click the file on the **Name** column to edit it in a separate tab. However, you cannot open the file in multiple tabs. If you attempt to open the file in another tab, you will be taken to the tab where it is already open. This prevents conflicting edits and potential data loss across sessions.

2. Edit the file. The changes are auto saved and synchronized to the file uploaded in the **Files** section.

Availability of Edit Document Feature

The **Edit Document** feature is available by default to the users in the US regions.

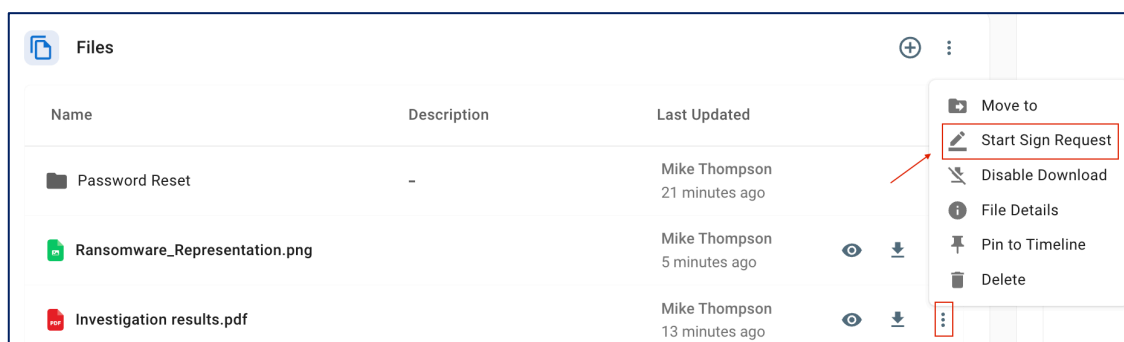

The **Edit Document** feature caches the file temporarily (30 days) on servers decided by Microsoft to render this service. CYGNVS does not have control on the locations of servers used by Microsoft. For more details, refer [here](#).

If you are from a different region other than US, contact support@cygnvs.com to give your consent to enable this feature.

The files uploaded to the **Files** section are stored in the respective CYGNVS regions.

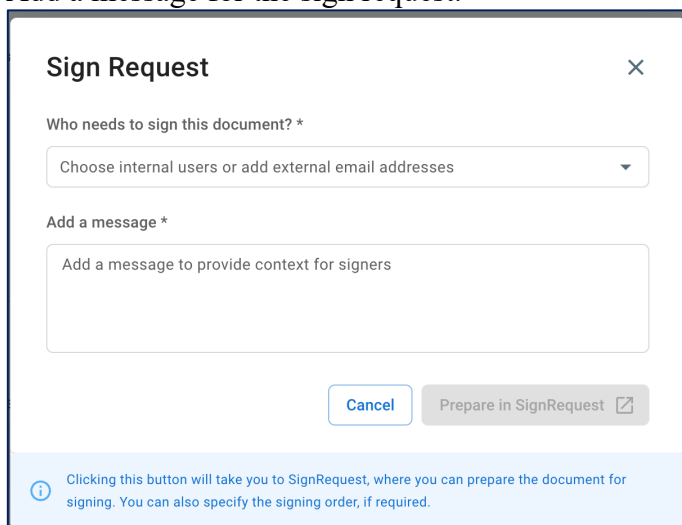

Document Sign Request

With the **Start Sign Request** option, you can send a PDF document to signer(s) for a sign request. It allows you to prepare the document for sign and sends automated emails to the signer to complete the sign request. However, during Isolate mode, you need to use the backup email to generate the sign request.

To start a sign request, complete the following steps:

1. In the PDF file's row, click the vertical ellipsis (three dots), and then click **Start Sign Request**.
2. Select the users to sign from the drop-down list or add external email addresses.
3. Add a message for the sign request.

Add a message to provide context for signers

[Cancel] [Prepare in SignRequest]

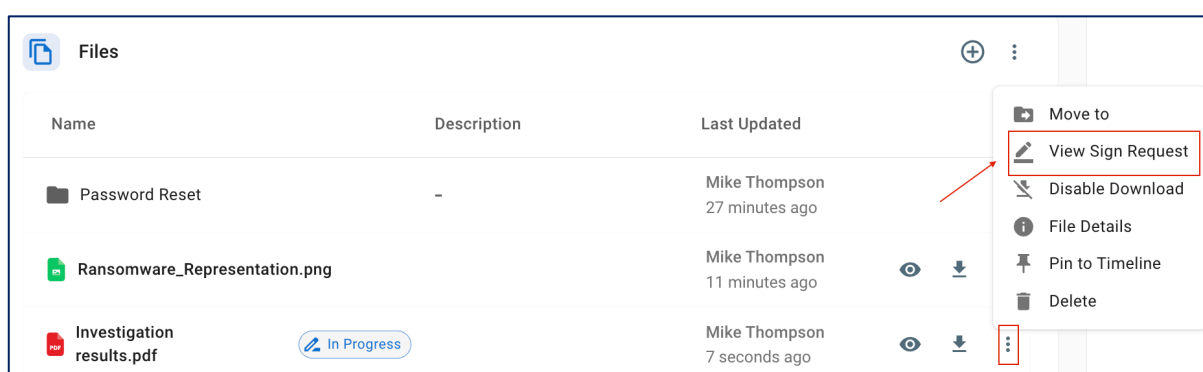

Clicking this button will take you to SignRequest, where you can prepare the document for signing. You can also specify the signing order, if required.

4. Click **Prepare in SignRequest**.

This feature involves a third-party web service provider called **SignRequest** to complete the document sign request. Follow the on-screen instructions in **SignRequest** site to complete the request. To know more how SignRequest works, refer [here](#).

Statuses

The status of documents in the **Sign Request** site is updated in the **Files** section. The **In Progress**, **Complete**, and **Decline** statuses are displayed next the .pdf file as below. The detailed status can be viewed by selecting **View Sign Request**.

Name	Description	Last Updated

Signees ☐ Sign by order

hanna.frost@acme.com Document Signed 15 Nov 2024, 10:01 AM

Click the **Right arrow (>)** next to the signer's email to view the detailed status.

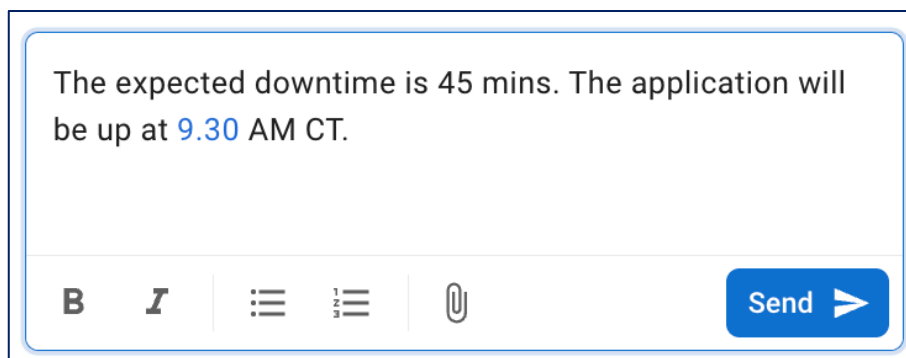

Below is the sample screenshot of the detailed statuses of a sign request where the signer has declined the document after viewing it.

Workstream Comments

Comments is a collaborative feature to engage with the users in a workstream.

The comments are common messages posted in a workstream. Only the owners and contributors in the workstream can post comments.

To add a comment, complete the following steps:

1. Add a comment in the **Comments** section.

2. Click **Send** or press **enter** or **return** in your keyboard.

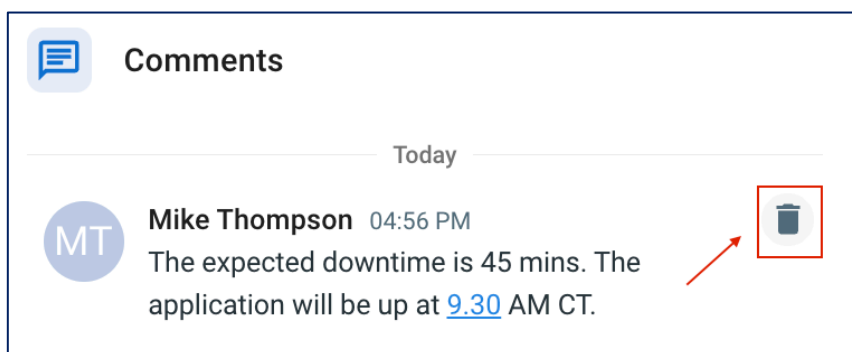

If you post a comment in or from the CYGNVS mobile app and it fails to send due to network instability, you'll have the option to resend the comment.

The posted comment is displayed as follows:

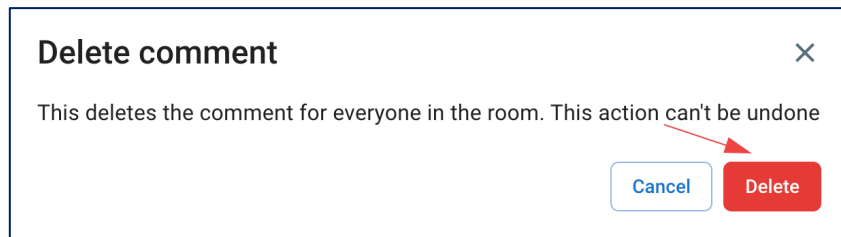

To delete a comment, complete the following steps:

1. Hover the mouse on the comment to be deleted.
2. Click the **Delete** icon.

3. Click **Delete** to confirm.

The comments can be deleted either by **room administrators** or the **respective author** of the comment. Even if you're an Owner in the workstream, you'll not be able to delete others' comments unless you're an Administrator in that room. The viewers in workstreams cannot delete the comments.

@ Mentions

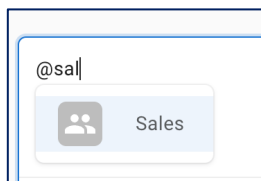

You can tag any user in the room or workstream by using @ before their name. Tagging a single user or a group of users notifies them through app and email. You can also use @ mentions in **Noticeboard** (within Rooms) and **Comments** (within Workstreams) sections.

You can use @ in the following ways:

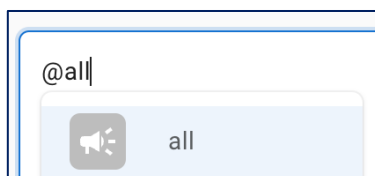

1. Tagging individual user. (For example, @ Username)

2. Tagging a group. (For example, @ Groupname)

3. Tagging all users in a room or workstream. (For example, @ all)

When you're tagged using @ in **Comments** within workstreams and you've not read it, then you'll see a list of them across workstreams in the Workstreams page.

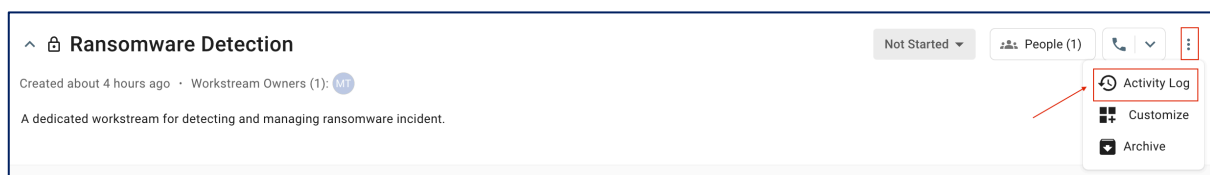

Click **Workstreams** from the left navigation menu. If you've mentioned at multiple instances, you can click @ multiple times and you'll be taken to the mentioned comments in the workstream.

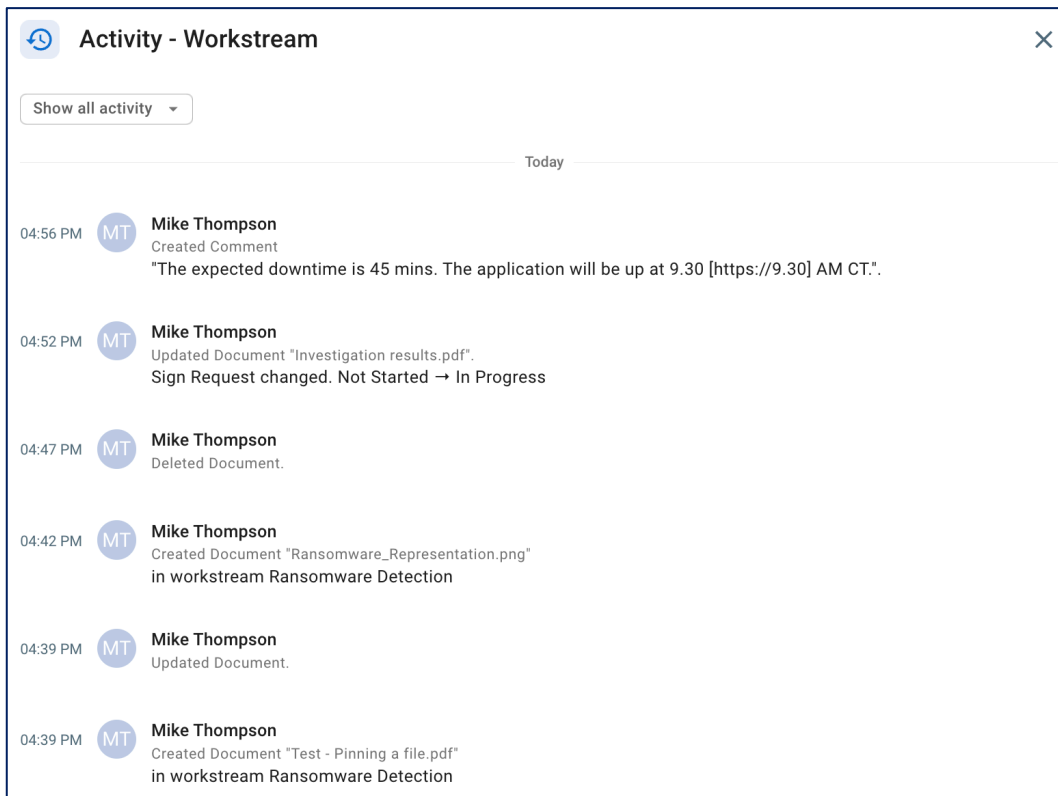

Once you've read all those mentions, the @ icon disappears from here.

Most Recent Activity

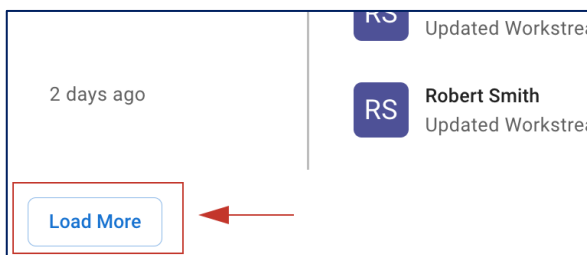

Click the vertical ellipsis at the top-right corner, and then click **Activity Log** to see a log of all the activities within the workstream. It helps you to stay informed about updates made by other team members. This feature is designed to track the sequence of events that take place during the resolution of an incident.

The activity log appears in a popup over the workstream.

By default, the popup displays the 15 most recent activity. To view more, click **Load More**.

The drop-down list on the top left corner of the pop-up has two options:

- **Show all activity** (default) – Displays all the activities in the workstream.
- **Show file downloads only** – Displays all files downloaded in the workstream through the **Files** section.

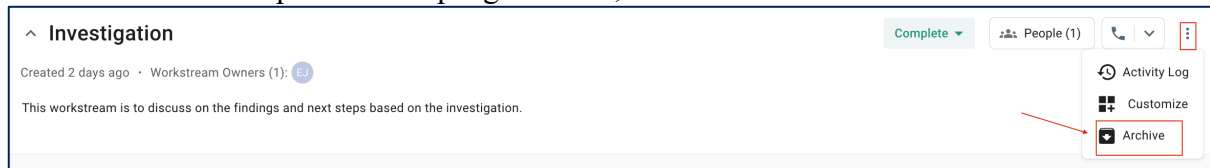

Archiving Workstreams

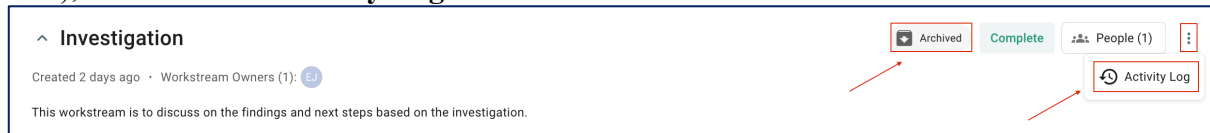

You can archive a workstream when the collaboration is complete or when you no longer need it but want to keep a record of the information without deleting the workstream. Once archived, the workstream becomes a read-only and no one will be able to edit it.

Only the Owners of the workstream can archive an unarchive it.

Click the vertical ellipsis at the top-right corner, and then click **Archive**.

Once archived, you'll see **Archived** label in the workstream. Click the vertical ellipsis (three dots), and then click **Activity Log** to see the activities in that workstream.

Once archived, click **Unarchive** if you wish to retrieve it.

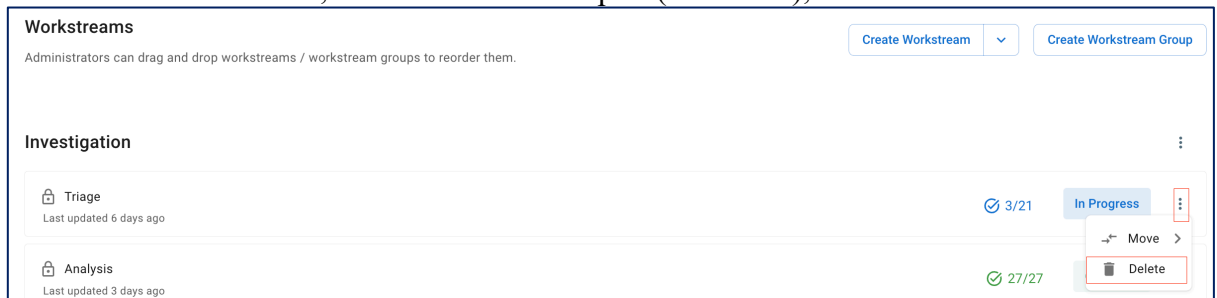

Deleting Workstreams

Click **Workstreams** from the left navigation menu to view all the workstreams that you've access to in a room.

Only the Owners of the workstream can delete it.

To delete a workstream, complete the following steps:

1. In the workstream's row, click the vertical ellipsis (three dots), and then click **Delete**.

2. Click **Delete** to confirm.

Call Collaboration

Calls are an easy way for collaborating with the users within a workstream. With a secured workspace, you can collaborate with all the stakeholders within CYGNVS platform. The video call feature is intuitive and connects the users to discuss or share the facts and tasks in the workstream.

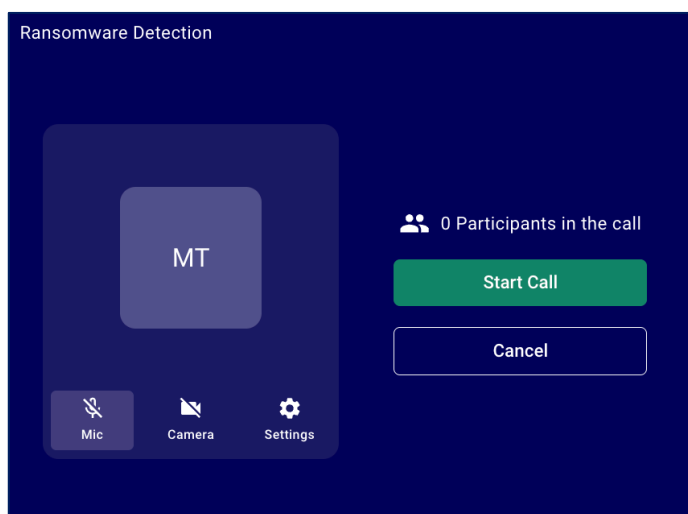

Calls made within a workstream are only accessible to users who are members of that workstream. Anyone in a workstream, regardless of their role, can start a call. However, users with the **Viewer** role cannot schedule calls.

You can access only one call at a time in the CYGNVS platform. To join another ongoing call in another workstream, you need to disconnect from the ongoing call.

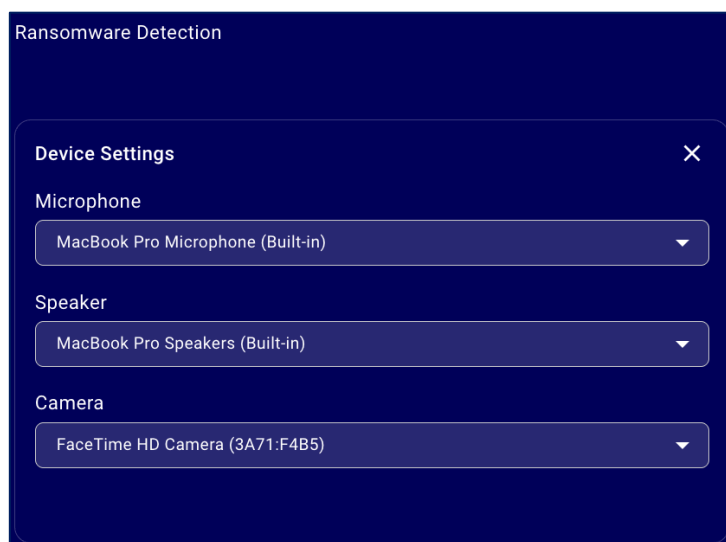

To start a call in an open or restricted workstream, click the **Call** icon.

The pre-call window is displayed on the bottom right corner of the screen.

You can check and configure the following settings in the pre-call window before initiating the call.

- **Mic:** Click to mute or unmute your mic.
- **Camera:** Click to allow or block video access from your device's camera.

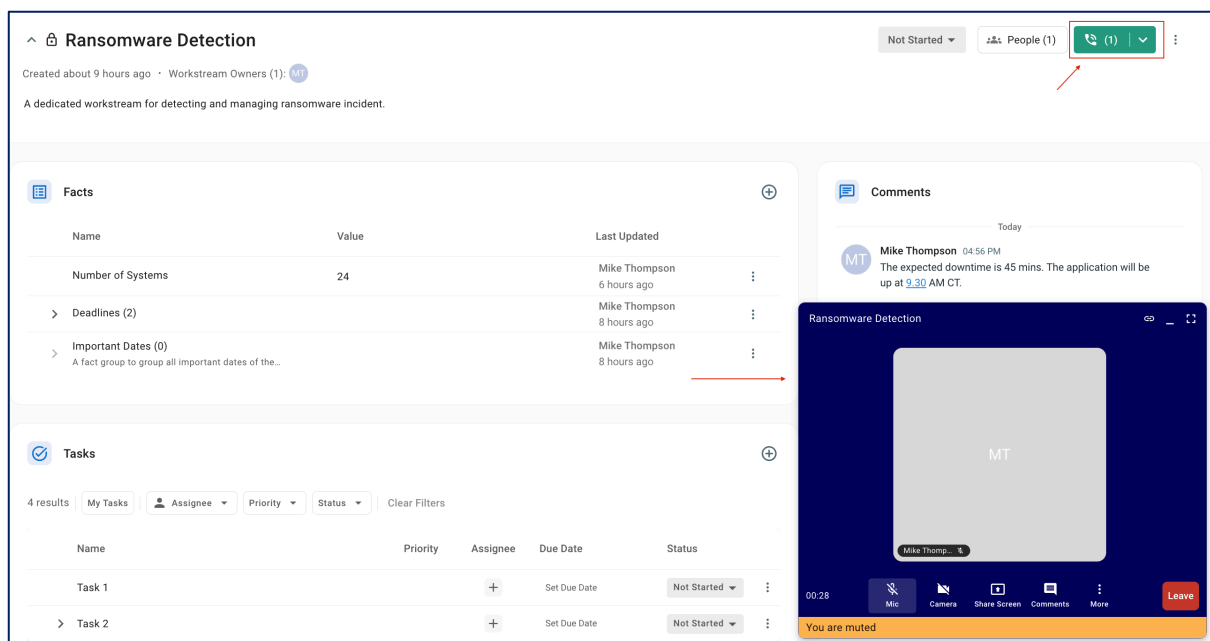

- **Settings:** Configure your device for video or audio calls.
 - **Microphone:** Select a source for audio input.
 - **Speaker:** Select a source for audio output.
 - **Camera:** Select a source for video input.

If a device is not shown in the settings list, refresh your browser to reset the device settings or contact your IT administrator.

Calls In Progress

The call widget appears in the middle of the screen and can be moved. The icon changes to show that a call is in progress.

When the call widget is active, you can browse to other parts of the workspace and rooms within the CYGNVS platform. The call is initiated and notified only to the users of the workspace.

The browser will prompt you to allow access to your microphone and camera. Click **Allow** to grant access. If you deny access, you'll be added as a listen-only participant in the call.

Call Notifications

You will receive notifications in the following channels when a call is started in a workspace you are a part of:

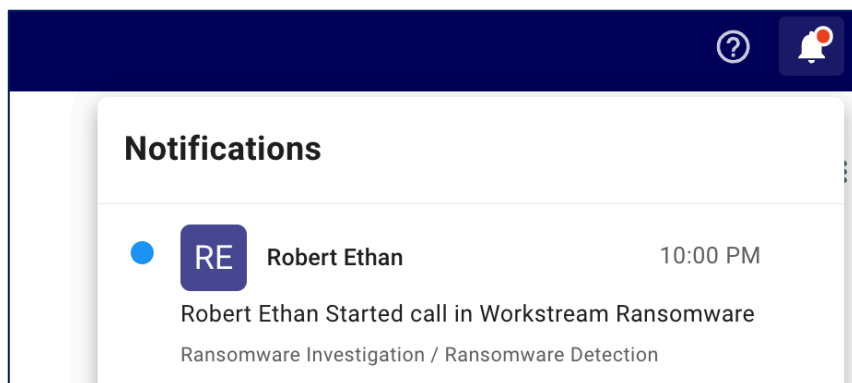

- Notifications menu
- Email notification
- Call icon in the workspace.

- Push notification in the mobile app

Notifications Menu

You will receive a new notification regarding the call in the **Notifications** menu. You can access the relevant workstream where the call is initiated by clicking the notification. In the workstream, you can join an ongoing call.

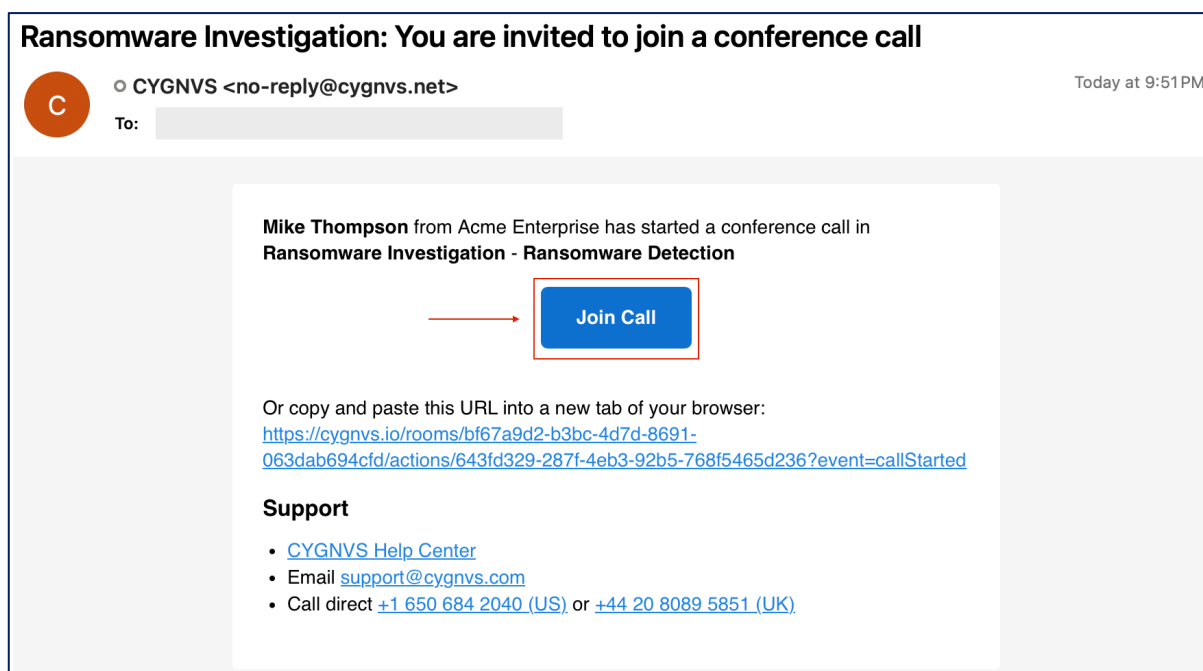

To learn more about joining calls, see [Joining and Leaving Calls](#).

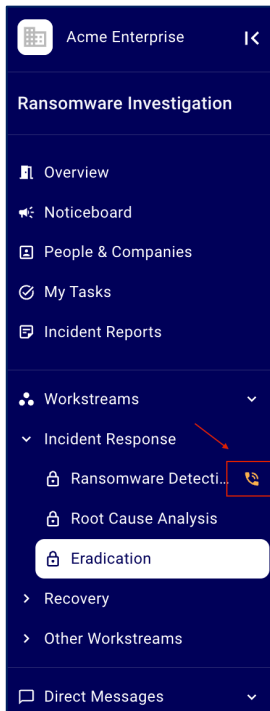

Email Notification

You will receive a new email notification regarding the ongoing call in your inbox. You can join the call by clicking the **Join Now** button or pasting the URL in the browser.

If you are not currently signed in to the CYGNVS platform, the page redirects to the **Sign-in** page for authentication.

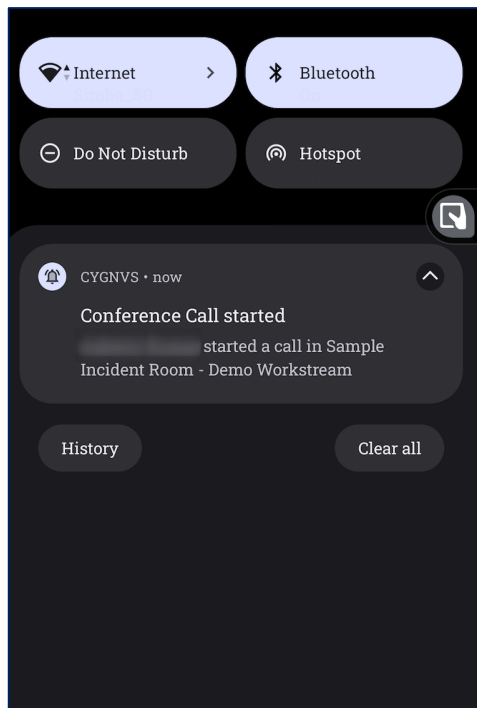

You will see a **Call** icon next to the Workstream name in the left navigation menu when a call has started.

Push Notification in Mobile App

You can see a notification in the CYGNVS mobile app when a call is started in the workstream.

To receive notifications through CYGNVS mobile app, you must be signed in to the CYGNVS platform.

Joining and Leaving Calls

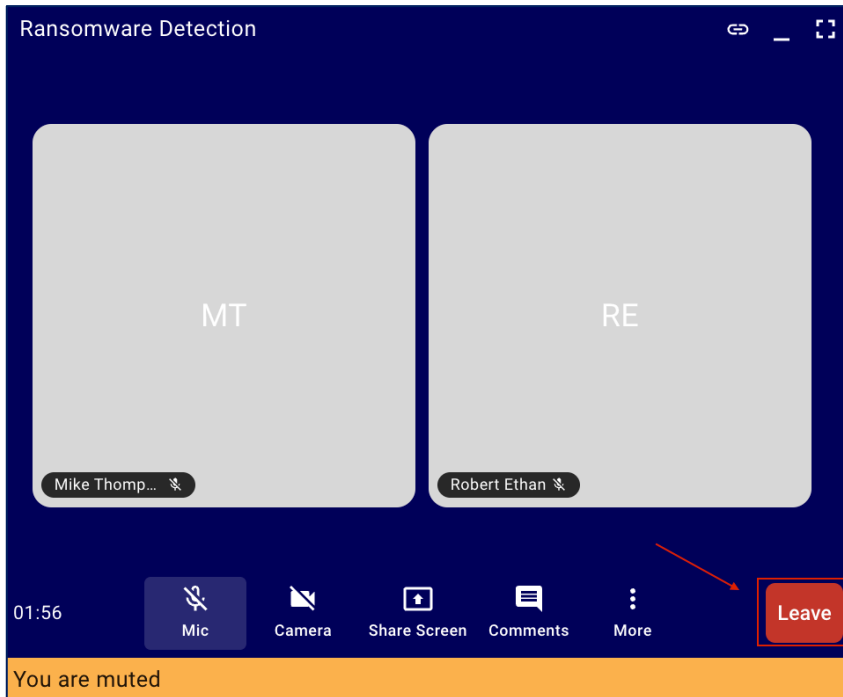

You can access the workstream where the call is taking place by clicking the workstream with call symbol or the link in the notifications.

Click **Join** to join the ongoing call.

The call widget appears in your browser window.

To leave a call, click **Leave** in the call widget.

Call Widget and Screen Sharing

The call widget displays within the browser window and has the following components:

- **Title of the Workstream:** The workstream's title is displayed here.
- **Copy Call Link:** You can copy the call link and share it with other users of the workstream to participate in the call.
- **Minimize:** Minimizes the call widget.
- **Expand:** Expands the call widget within the browser window.
- **Participants' Display Pictures:** Displays the participants' display pictures available in the call.
- **User's Call Duration:** Displays the total duration of the user's presence in the call.
- **Mic:** Mutes the user's microphone.
- **Camera:** Displays the user's video in the call.
- **Share Screen:** Shares the user's screen in the call.
- **Comments:** Displays the comments section of the workstream during the call.
- **More – People:** Lists the total participants available in the call. You can mute all the participants in this section.
- **More – Settings:** Displays the settings to configure your Microphone, Speaker, and Camera of your device.
- **Leave:** Click to leave the call.

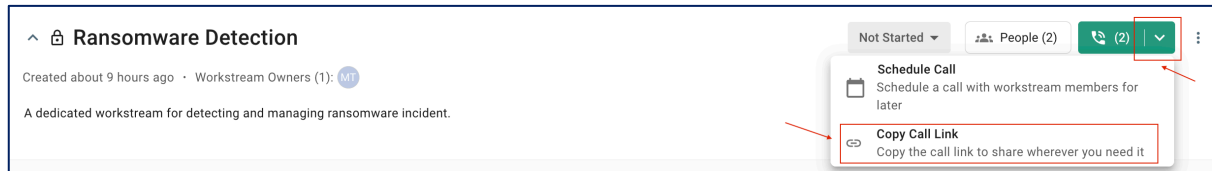

Title of the Workstream

The title of the workstream in the call widget is for the reference of workstream members to indicate which workstream the call was started in.

The title of the workstream is a non-editable field.

Copy Call Link

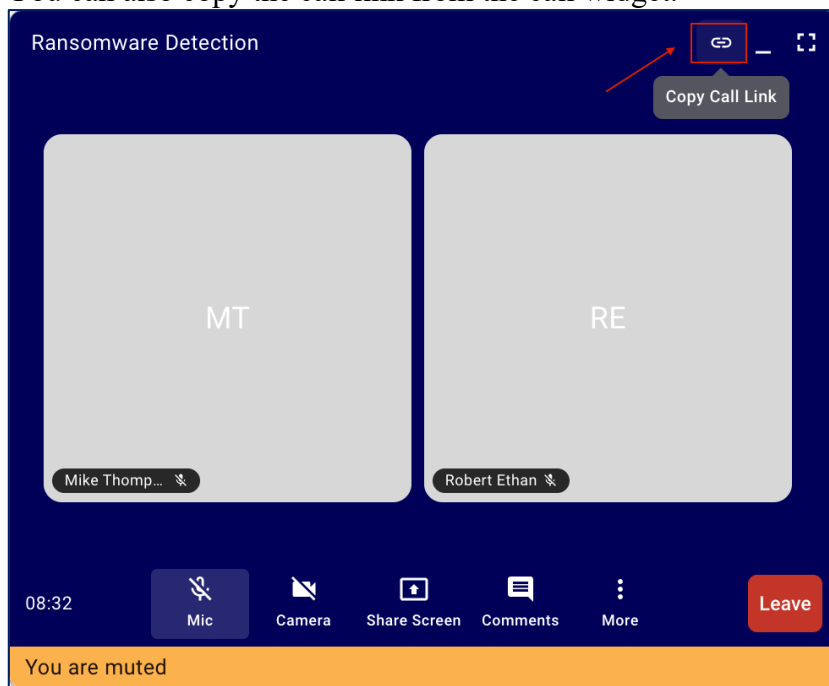

To join the call, share the call link with other workstream participants. Users can join the call immediately by clicking the direct call link rather than looking for the particular workstream in rooms.

The call URL is copied to your clipboard when you click **Copy call link**. The link can now be shared to other members of the workstream.

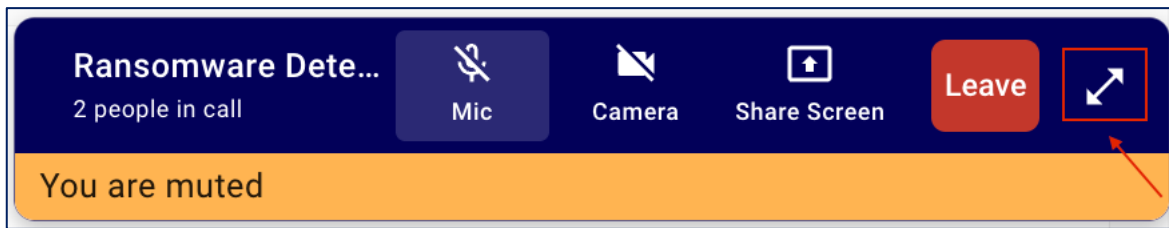

It is recommended to share the copy call link through a direct message to a user within the CYGNVS platform.

You can also copy the call link from the call widget.

Minimize

Click the **Collapse** button to minimize the call widget. The widget is shown as follows when it is minimised.

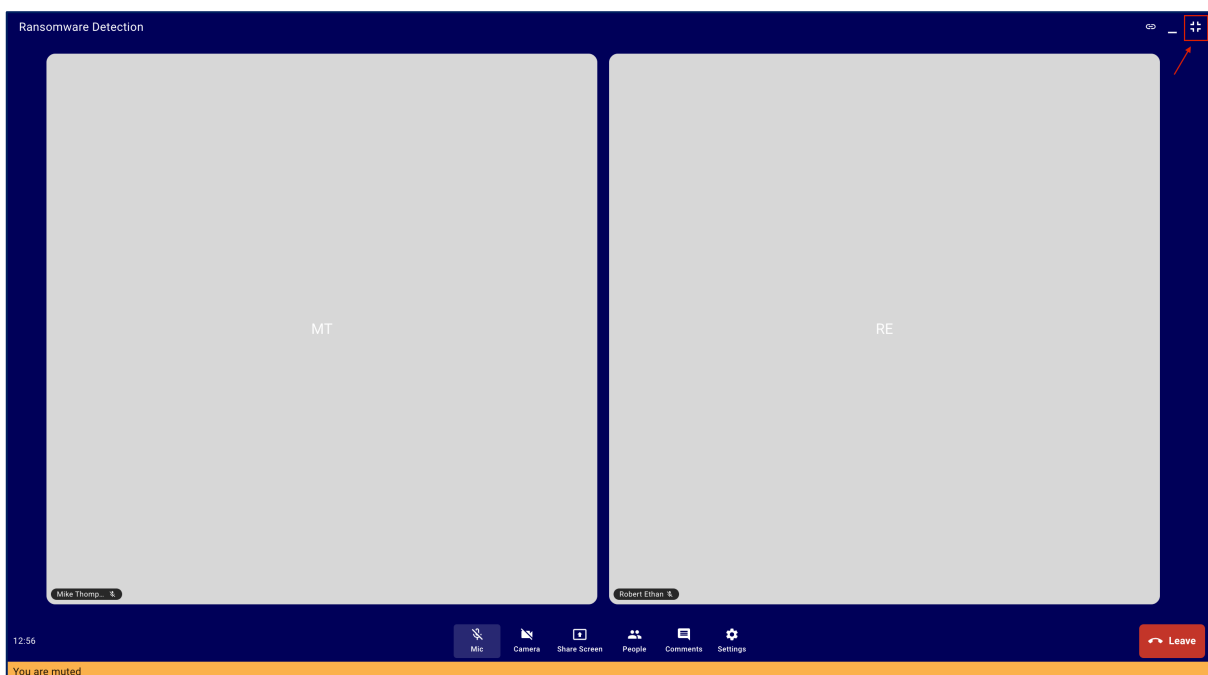

To restore the widget to its normal size, click the **Expand** button.

Expand

Click the **Expand** button to maximize the call widget. The widget is shown as follows when it is maximized.

Now, you can click the **Collapse** button in the expanded view to restore the call widget to its default size.

Participant's Display Pictures or Video Feed

The call widget shows the participants' display images or video feed. You can see the other participant's video when the participant turns on their video, and the participant's display picture is shown when the participant turns it off.

While the screen is shared by a presenter, the display pictures are displayed on the right side of the screen. The shared content is visible in the centre of the call widget.

User's Call Duration

It shows the total duration of your participation in the call.

This duration does not indicate the start of the call. If you leave and rejoin, the duration resets to zero.

Mute

Click the **Mic** button to turn off or on your microphone. To configure the microphone settings, refer [Settings](#).

Start Video

Click the **Camera** button to turn on or off your video in the call. When the video is off, the widget displays your profile picture. To configure the camera settings, refer [Settings](#).

Share Screen

Click the **Share Screen** button to share your screen with the other participants. You'll be prompted to share one of the following:

- Browser Tab
- Window
- Entire Screen

Ensure your system administrator has enabled screen sharing on your device.

Browser Tab

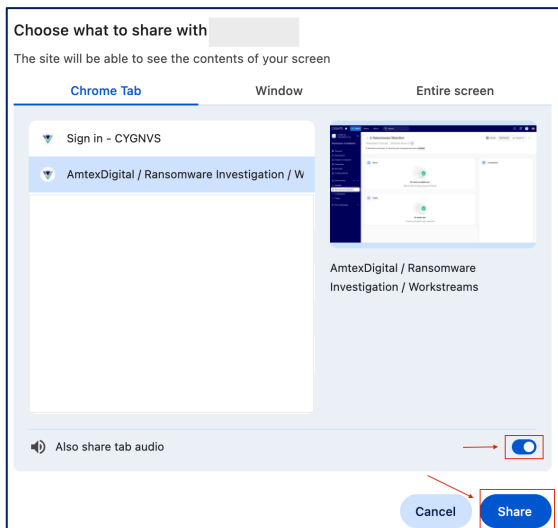

You can let the participants see the contents of any browser tab you like. To share it, complete the following steps:

1. Click **Share Screen**.
-

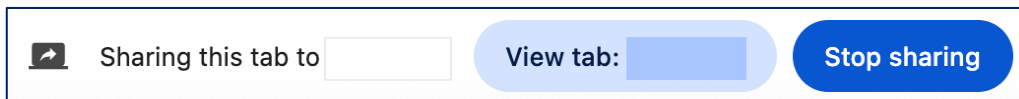

Follow the onscreen instructions on your browser to configure and select the permissions of your devices.

2. Under **Browser Tab**, select a browser tab from your browser list.
3. (Optional) Toggle **Also share tab audio** (Required for tabs playing a video).
4. Click **Share**.

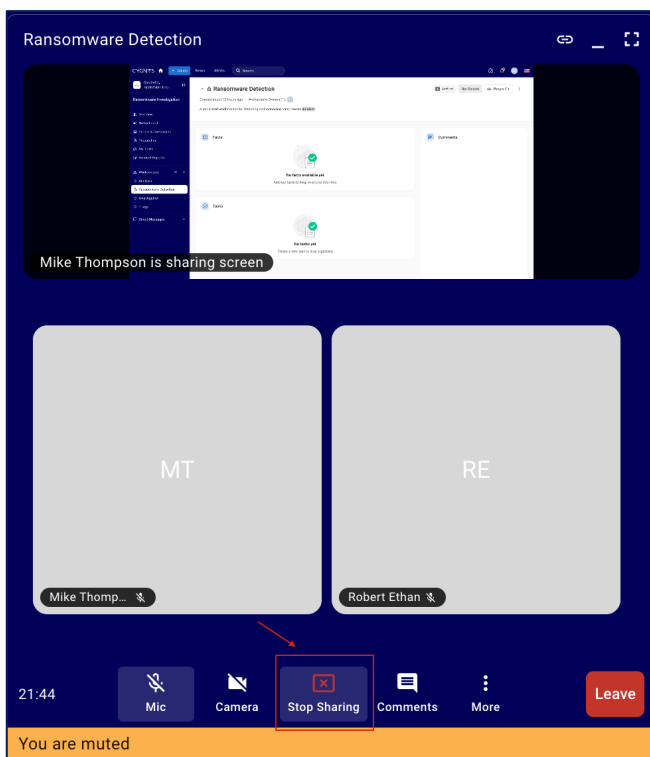

The below screenshot shows the screen sharing option in a **Google Chrome** browser window.

The shared tab displays the following buttons:

To stop sharing the tab, click **Stop Sharing** in the browser tab or in the call widget.

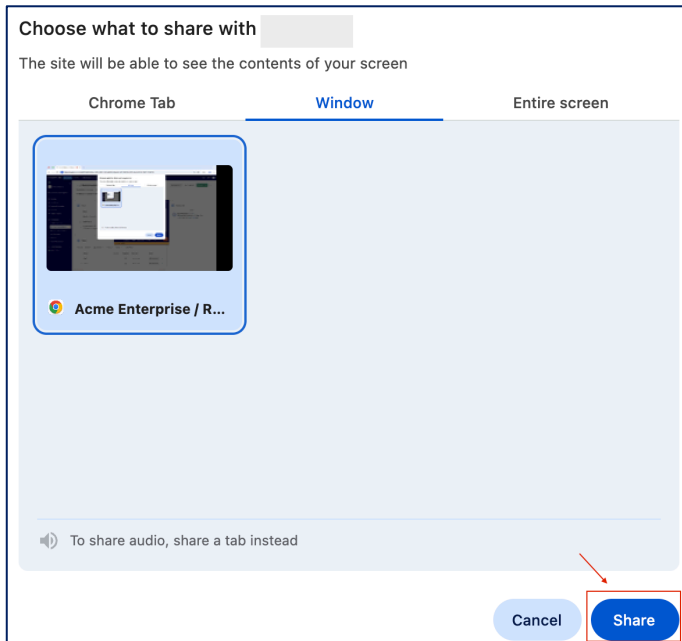

Window

You can let the participants see the contents of any opened application windows in your device. To share it, complete the following steps:

1. Click **Share Screen**.
2. Under **Window** tab, select a window from the list.

3. Click **Share**.

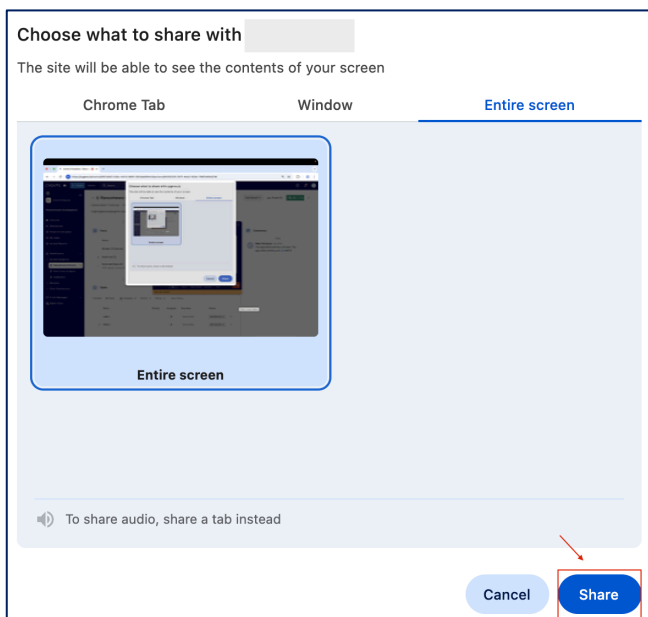

To stop sharing the window, click **Stop Sharing** in the window tab or in the call widget.

Entire Screen

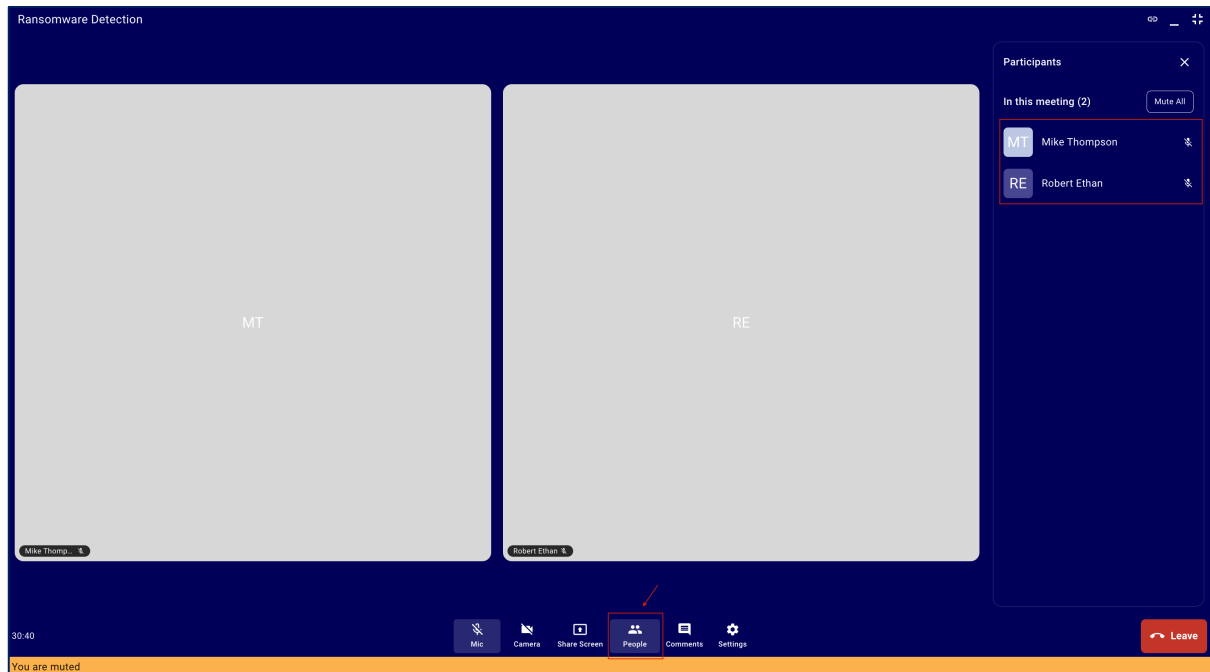

You can let the participants see the entire screen of your device. To share it, complete the following steps:

1. Click **Share Screen**.
2. Under **Entire Screen** tab, select a screen.
3. Click **Share**.

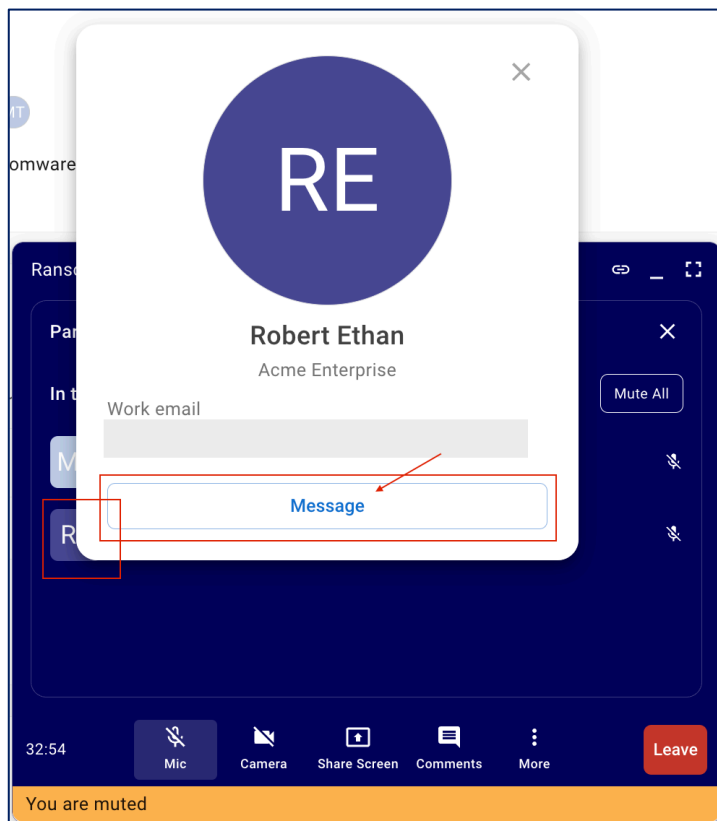

To stop sharing your screen, click **Stop Sharing** in the widget.

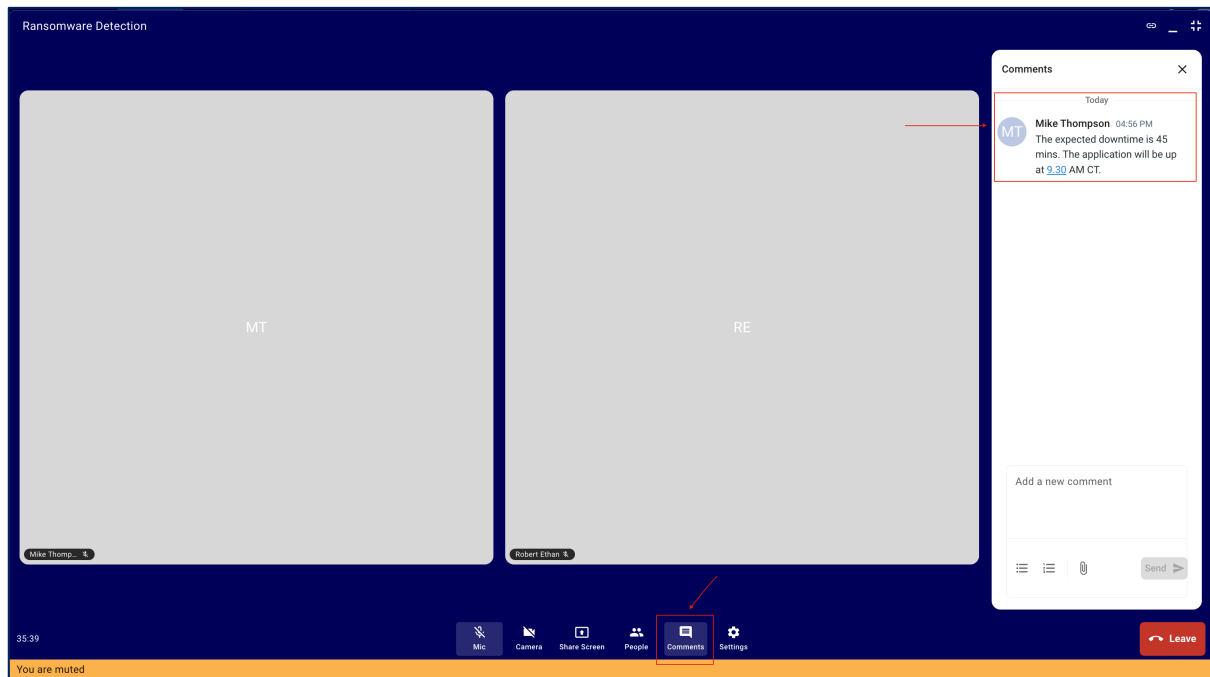

You can see the list of participants in the call along with their display picture, name, and mute status.

Click on a participant's user card to view their name, contact details, and click **Message** to send them a direct message in the CYGNVS platform.

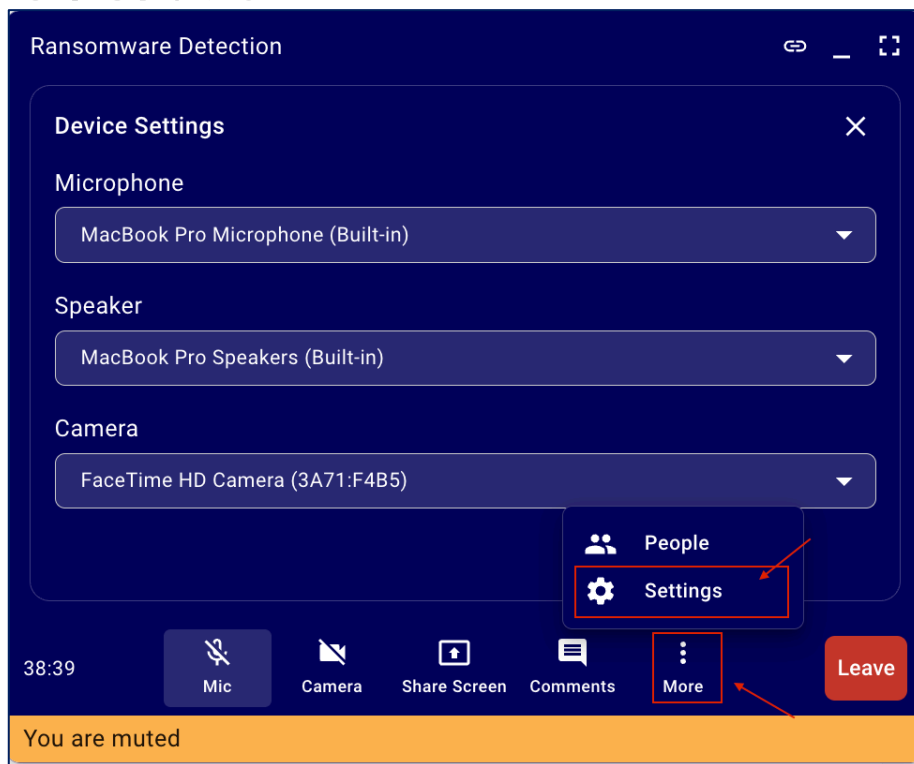

Click the **Comments** button to interact with the other participants during the call.

Settings

You can customize your device's microphone, speaker, and camera settings in the **Device Settings** menu. From the drop-down list, choose your microphone, speaker, and camera sources. The list shows both the default and available accessories.

If your accessory is not listed in the list, contact your system administrator or check your device settings.

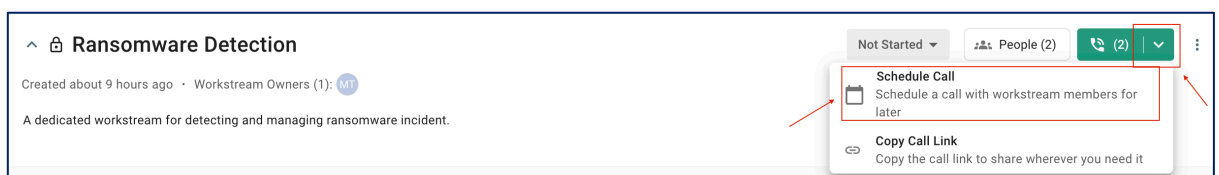

Scheduling Calls

Schedule Call option lets you to schedule a call with the workstream users. A scheduled call displays the call timings on top of the workstream and notifies the users. It helps users to be aware of it and allows time to prepare for the meeting.

Anyone in a workstream, regardless of their role, can start a call. However, users with the **Viewer** role cannot schedule calls.

To schedule a call, complete the following steps:

1. From the **Call** drop-down list, click **Schedule Call**.

2. Select the date and time of the call.
3. Select a time zone.
4. Click **Schedule**.

Cancel Call

Users in a workstream with **owner** or **contributor** privileges can **schedule** or **cancel** a call in the workstreams.

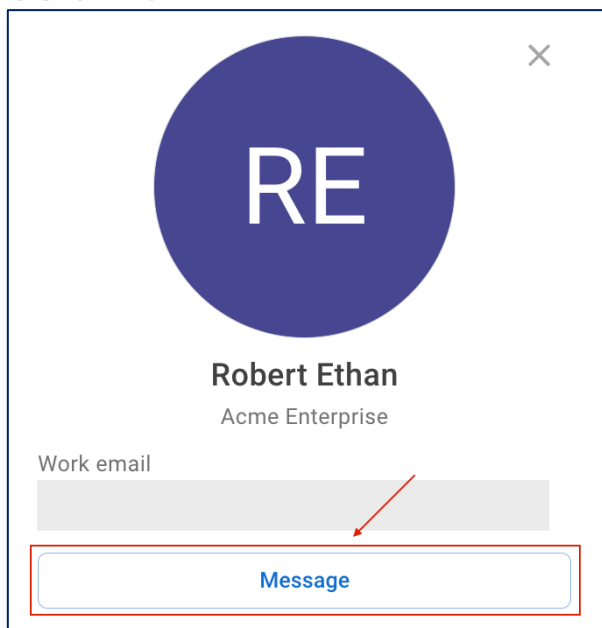

Direct Messages

Direct Message feature allows you to have private conversations with the users in the room. This enhances communication and collaboration within the room, making it easier for users to connect and share information in real-time.

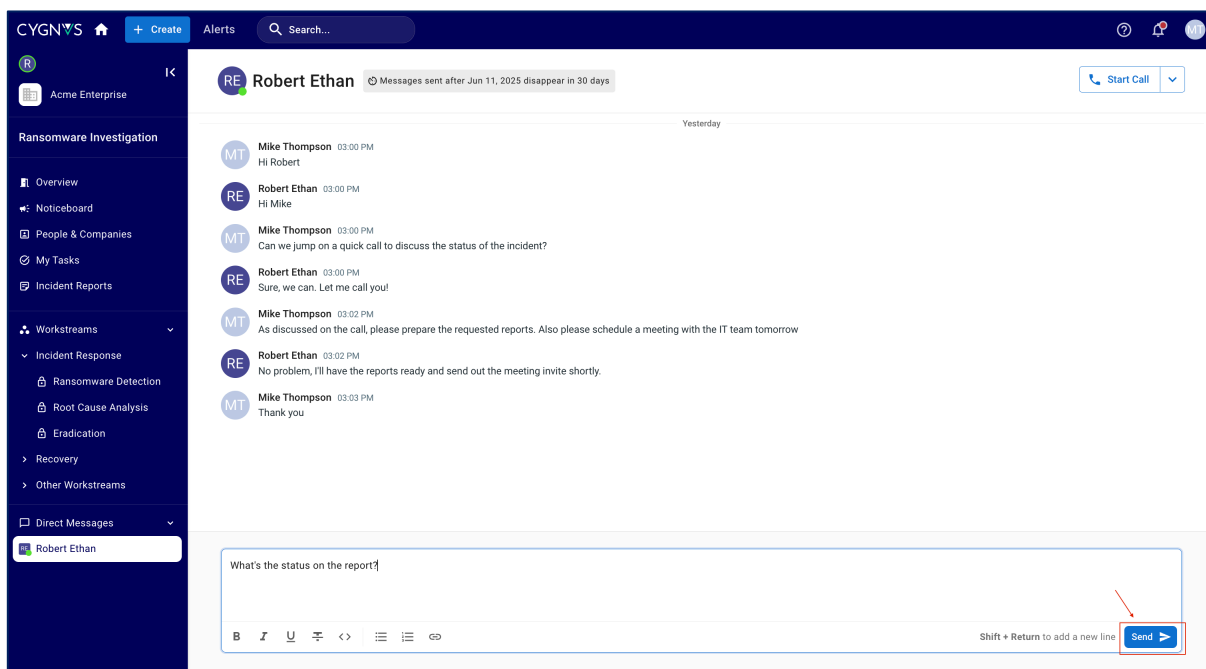

Direct messaging and calling are only available within rooms. All direct messages and calls between two users are stored in the room where they happen.

To send direct messages, complete the following steps:

1. Click on the **User Avatar** icon anywhere inside the room.
2. Click **Message** to initiate the private chat.

3. Enter a message to the room user.
4. Click **Send**.

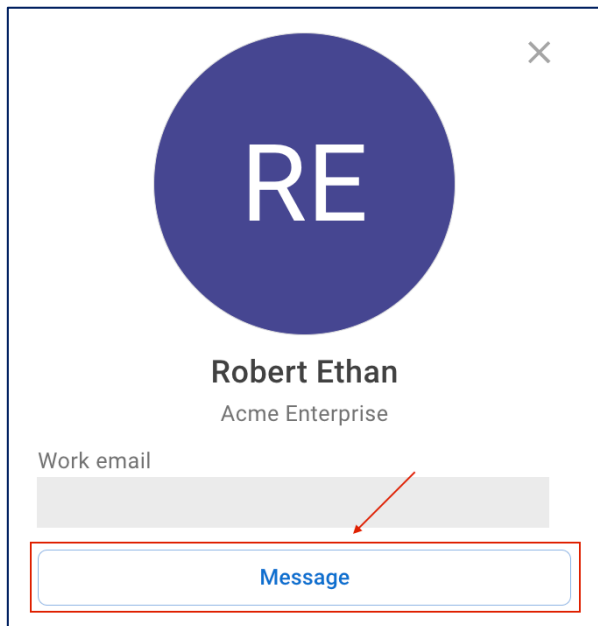

Direct Calls

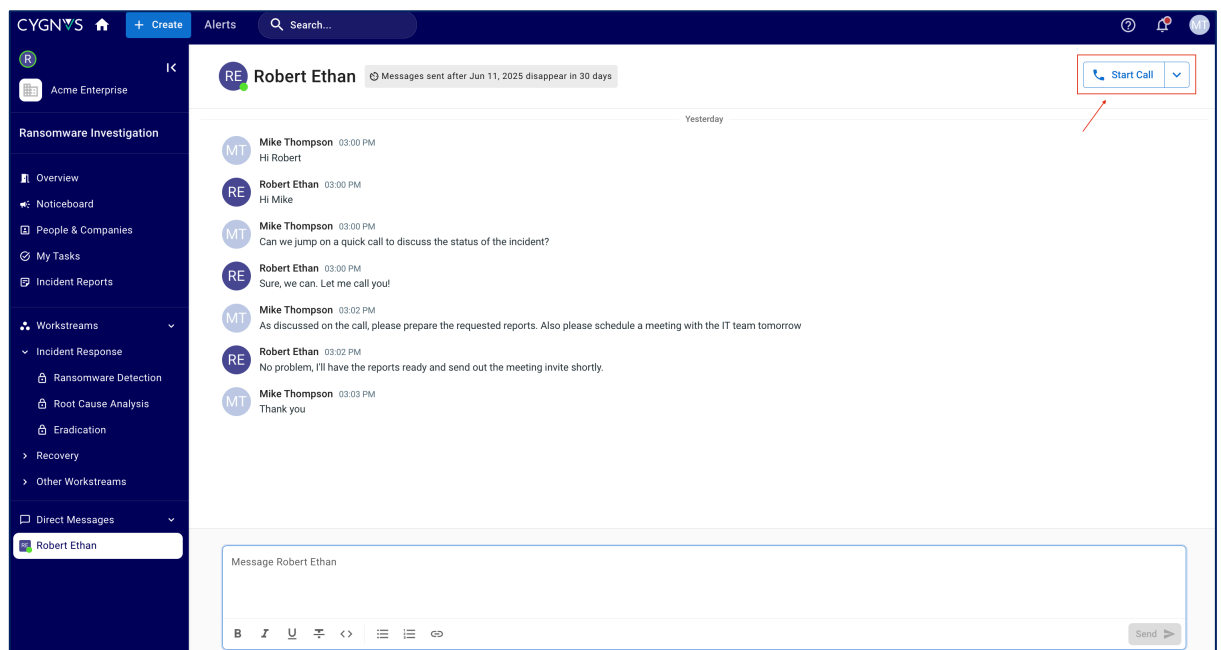

Direct calls are one-to-one calls between two users. In addition to sending a direct message, you can start a direct call with a user within a room.

To make a direct call to a room user, complete the following steps:

1. Click on the **User Avatar** icon anywhere inside the room.
2. Click **Message**.

3. Click **Start Call**.

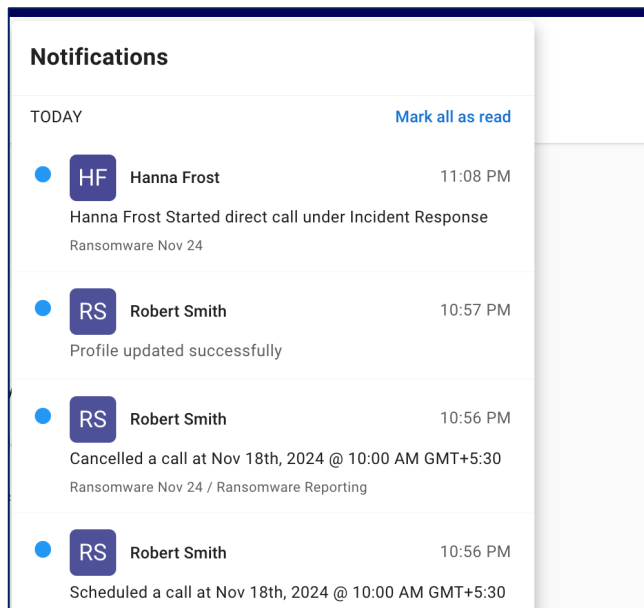

The call widget displays after initiating the call. To know more about call widget, refer [Call Widget and Screen Sharing](#).

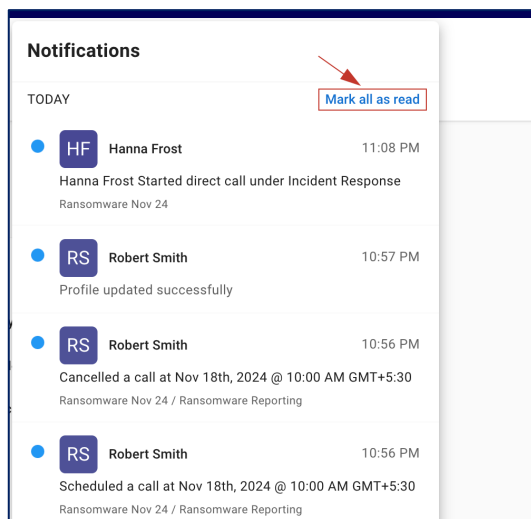

Notification menu in the global navigation bar consolidates all your notifications within CYGNVS. The **Bell** icon displays a red dot to indicate the new notifications.

To view notifications, click **Notifications**. They will be displayed as shown below.

To mark all the notifications as read, click **Mark all as read**.

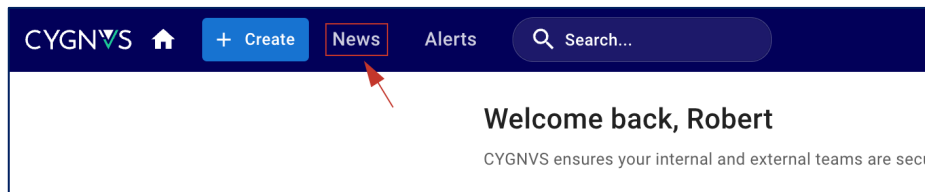

News section is where providers post their latest news, announcements, and updates to their clients. **Room providers** can compose news post, edit the existing posts or delete them.

The news functionality is available for the following users:

Users	Availability
Insurance Partners	☒
Vendors	☐
Enterprise Users	☐
Clients	☐

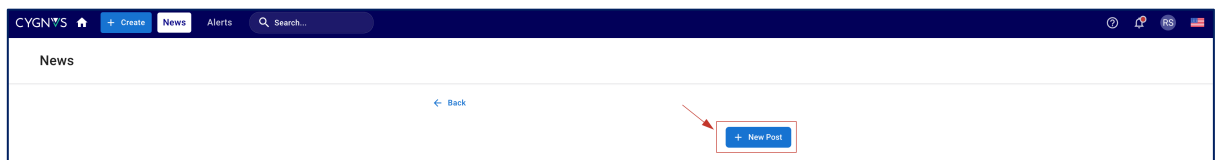

Click **News** section on the global navigation menu to access the news posts.

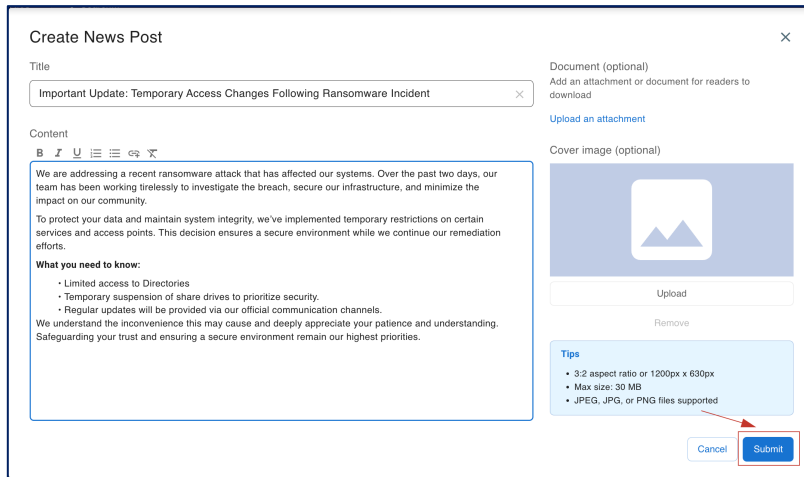

Adding a News Post

To add a new news post, complete the following steps:

1. Click **+ New Post**.

2. Add a title for the news post.
3. Add the content of news post.
 - a. (Optional) Click **Upload an attachment** to attach documents.
 - b. (Optional) Click **Upload** to upload cover images.
4. Click **Submit**.

Title
Important Update: Temporary Access Changes Following Ransomware Incident

Document (optional)
Add an attachment or document for readers to download
[Upload an attachment](#)

Content
We are addressing a recent ransomware attack that has affected our systems. Over the past two days, our team has been working tirelessly to investigate the breach, secure our infrastructure, and minimize the impact on our community.
To protect your data and maintain system integrity, we've implemented temporary restrictions on certain services and access points. This decision ensures a secure environment while we continue our remediation efforts.
What you need to know:
• Limited access to Directories
• Temporary suspension of share drives to prioritize security.
• Regular updates will be provided via our official communication channels.
We understand the inconvenience this may cause and deeply appreciate your patience and understanding. Safeguarding your trust and ensuring a secure environment remain our highest priorities.

Editing a News Post

To add an existing news post, complete the following steps:

1. Click the vertical ellipsis (three dots) beside the News post, and then click **Edit**.

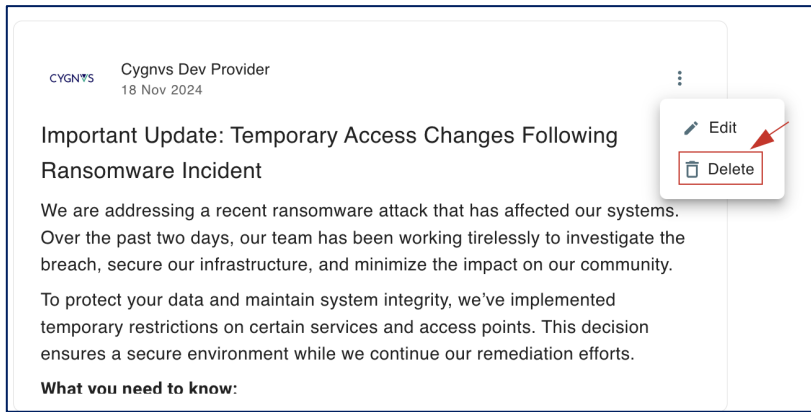

2. Edit the title of the news post.
3. Edit the content of news post.
 - a. (Optional) Files can be replaced or added in the **Document** section.
 - b. (Optional) Cover Images can be replaced or added.
4. Click **Update**.

Deleting a News Post

To delete an existing news post, complete the following steps:

1. Click the vertical ellipsis (three dots) beside the News post, and then click **Delete**.

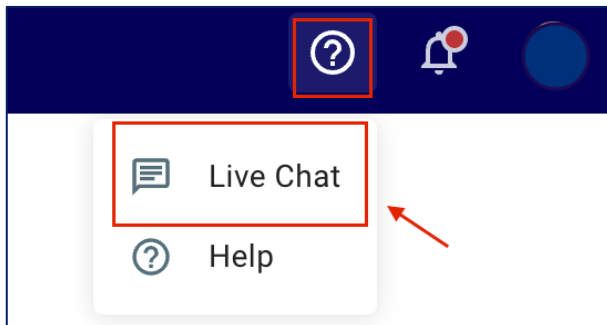

2. Click **Delete** to confirm.

Live Chat

Live Chat is available 24*7 and CYGNVS support team is available to assist you.

To initiate a live chat with CYGNVS support agent, click **Help (?) > Live Chat**.

The **Live Chat** window is displayed as below:
